"Icon Legacy Custom Modular Homes, LLC (“Icon”) is a B2B manufacturer and supplier of custom systems-built modular components. This company is not a builder or developer. Icon does not employ or subcontract builders, dealers or sales agencies, and does not sell any modular components or other building materials directly to the consumer/homebuyer. The plans and specifications for the modular components are approved by a third party engineering firm authorized by the respective state where the modular components will be used in the construction of a building. Independent builders using Icon’s custom systems-built modular components are responsible for the proper finish of their project(s) in which these components from Icon are used. Icon is not responsible for any damage or injury resulting from use or misuse caused by other parties."

Merillat® Classic Cabinetry

Overlays (Based on individual door styles):

Full Overlay (FO)

An overlay that covers most of the face frame, giving prominence to the door and drawer design. A full overlay creates a more custom and clean look.

Traditional (Partial) Overlay (TO)

Overlay is the amount of face frame covered by the door and drawer. The reveal on traditional overlay cabinets is typically one inch. A traditional overlay creates a traditional look and is typically less expensive.

Center Panels (Based on individual door styles):

Raised Panel

The center panel is raised. It provides design dimension and interest.

Recessed Panel

The center goes inward. Recessed panel designs create a fresh look.

Slab Panel

A flat panel with no variance in the center. It provides a clean, modern look that dares to be simple.

Shapes (Based on individual door styles):

Arch

The top of the panel is curved. It provides an architectural element and design interest (wall or tall cabinets only).

Square

Panels that have right angles on all sides. Creates a look like a framed piece of artwork on every door.

Continued on next page...

Available Upgrade Glass Inserts (Not available in all door styles):**Arch Mullion Glass****Full Glass****Prairie Mullion Glass****Square Mullion Glass****Wood Types:****Cherry**

Cherry is moderately hard and heavy, and has a fine-to-medium uniform grain. Cherry is commonly thought of as a deep color, but is quite different depending upon your choice of stain. Expect variations.

**Hickory**

Hickory is a very heavy, hard wood, and has a grain with quite a bit of variance. This creates a design element in and of itself, taking on colors in unique ways. No two doors will look alike.

**Laminate**

Laminate is a thermo-plastic polymer wrap that is applied to engineered wood or Medium Density Fiberboard (MDF). This cabinetry gives you a uniform appearance.

**Maple**

Maple is a popular choice featuring a fine uniform grain that takes a color quite well. Maple is versatile and available in nearly every color combination. A very consistent wood type.

**Oak**

Oak is a heavy, hard wood, and has a medium-fine, noticeable grain. It gives you dramatic lines that play quite differently off of each color.

**Textured Laminate**

Textured Laminate is a plastic-based product that has proven to be highly durable. This cabinetry gives you a consistent appearance.

**Thermofoil**

Thermofoil is a solid colored vinyl that is applied to smooth, engineered wood or Medium Density Fiberboard (MDF). Easy to clean and built to last, Thermofoil cabinetry gives you a uniform appearance.

**Veneer**

A veneer is a thin piece of solid wood that is attached with glue to a supporting board. Veneered components are more uniform in finish and grain, and commonly used as the material for the center panel of a door.
