

VOTER ENGAGEMENT

Our democracy works best when all students, regardless of their identity, vote. That is why **the WSA fought to get mail in voting, same day voter registration, automatic voter registration, and ballot drop boxes on all of our campuses.**

However, constantly changing addresses, improper registrations, lacking transportation to polling sites, being first-time voters and limited access to childcare are some of the reasons that **students are one of the most disenfranchised groups of voters in the nation.**

When we're not pushing for increased voter access in the legislature, we're **training students on effective voter registration, coordinating 'Student Engagement Centers', and doing our own voter outreach events.** During the 2020 election, we teamed up with community organizations and student leaders to text over **100,000 students**, reminding them to vote and helping them express their civic duty.
