

Allergy Testing & Allergy Drop Immunotherapy

Experience lasting relief with our Allergy Program, designed to deliver significant results in as little as 3 years. For some individuals, optimal outcomes may take up to 5 years, ensuring a sustainable, long-term solution to your allergy symptoms.

Allergy Testing

In-office skin testing option for Tulsa area patients

- Identifies specific allergens by applying small amounts of allergens to your skin and checking for reactions
- Requires stopping medication & supplements 5-7 days prior to testing
- Testing takes 1 hour, mild itching or bumps may occur

Blood testing option via LabCorp for telehealth patients

- No medication or supplement restrictions required for blood testing
- Blood testing is required for food allergy testing

Insurance not accepted for allergy testing
