★ Discount on consults for Police, Fire Fighters, Teachers, Military Personnel & Veterans.

Lab Services

OPTION ONE

Self-Pay - Our office partners with LabCorp and we will send your lab requisition electronically to LabCorp. Our office will charge the card on file for the lab panel and fees. We receive a discount, and we pass that discounted price along to our patients. **Please note: ONLY GO TO A LABCORP FACILITY.** If you go to a different lab, you will be responsible for any charges incurred.

OPTION TWO

Self-Provided - If you have a primary care physician or another source for labs, please contact our office for the list of required lab panels. You will be providing our office with recent lab results that you have obtained through an independent source or another provider's office. **Please note: There is a \$95 processing fee to utilize this option.** Any labs ordered outside of our office, including LabCorp that are not ordered through our office, require additional time and resources to manually input every lab value. **All self-provided lab work will be reviewed to ensure that proper tests were ordered. If labs are not satisfactory, you may be required to have lab work performed at a LabCorp facility.**

PLEASE NOTE - Our office **DOES NOT participate with any insurance providers. We are a fee-for-service provider only.** If you choose to use insurance for your labs, you will need to find your own provider that participates with your insurance and will accept insurance for your lab.

Rx Medications

Medical insurance companies are a major cause of the dysfunction destroying healthcare in America. **We will not work with or engage with medical insurance companies for any reason.** This includes responding to prescription medications, and approving any prior authorizations if an attempt is made by the patient to use insurance at the pharmacy. Prescriptions are cash pay (out of pocket) at the pharmacy and patient responsibility. If you prefer to use insurance for your prescription medications you will need to find an in-network provider that will accept insurance.

Office Policy

We have a 24-hour cancellation policy.

Payment is required at the time services are rendered. Pricing and policies are subject to change. The patient will be billed in 15 minute increments. Please note, if the appointment extends more than their allotted time, the patient will be billed accordingly. Please confirm with patient support any revisions which may have recently occurred.

Our patients participate in a fee-for-service medical practice. Any lab work or medication fees are the responsibility of the patient. For questions that can be answered by the staff, there is no charge. If the question involves the need for a provider consultation, we will notify you of that need, schedule a consultation, and a consultation fee will apply.
