2020 Health Vision

Body Scan and Body Reboot Wellness Packages

Subscription to my health and wellness package is an economical way to lower your risk to disease while improving your overall quality of health. Save up to forty percent per service when you invest in a wellness package. That's less than \$100 dollars a month for most packages and you get access to many holistic services. Health packages are designed to help you stay on track with meeting your health goals. I offer access to the most advanced and comprehensive holistic interventions on the market. All services are based on a plethora of research to validate their efficacy.

Some health spending benefit programs are accepted. Contact the office to verify acceptance of your health benefit program. Before investing in the 2020 health vision, please read each health and wellness program description to select the one that meets your needs.

All services are holistic in nature and for this reason they are not used to support disability claims, a medical diagnosis nor should the holistic services be presented to a medical doctor to validate a diagnosis. I am a health psychologist who has diverse training in holistic interventions. My health and wellness packages are designed to coach the client in behavioral health and wellness interventions. Adults and children can benefit from a health and wellness package.
