

Julia L. Butterfield Memorial Library
SUSTAINABILITY POLICY

The Julia L. Butterfield Memorial Library is committed to promoting responsible environmental stewardship and sustainable business operations at all levels of the organization. Our goal is to minimize our impact on the environment, ensure a sustainable future, and promote community resilience.

We will strive to minimize pollution and waste, conserve energy and water, protect habitats, support renewable energy resources, buy environmentally-friendly products, and encourage environmentally preferable transportation.

These efforts will extend to our relationships with contractors and vendors. We will encourage anyone serving or otherwise acting on behalf of the library to meet our standards of sustainability.

The understanding and involvement of stakeholders at all levels of the library are essential to the implementation of this policy. Everyone will be informed and educated about the library's sustainability goals.

Adopted 10.19.22
