

Local Government Forum

Steve Delmartini

This is a Forum so there are no motions made. This will be a "Committee" next year so there may be motions made in the future. The reports that are given are mostly from association Government Affair Directors (GAD's) statewide.

Many of the reports covered climate action plans that were including point of sale items such as home energy efficiency reports, electrical panel inspections etc... that are also tied to the "electrification" of homes movement.

Oakland and Berkley (mostly Berkley) discussing the elimination of single-family residential zoning and looking at some sort of multifamily zoning in its place.

A new rent control measure in Burbank.

Elimination of short-term rentals in Palm Springs.
