

BIO 2022

Gerhard "Gerry" P. Muenchmeyer, P. E.

Principal; Muenchmeyer Associates, LLC

Gerry Muenchmeyer is a registered professional engineer, with over 50 years of experience in the pipeline industry and, for the last 38 years, he has been very actively involved in the development of the trenchless pipeline industry both in the United States and internationally.

For many years, Mr. Muenchmeyer was instrumental in installing the cured-in-place-pipe (CIPP) technology in New England and his professional career since then has been dedicated to the development, support and promotion of trenchless pipeline rehabilitation technologies including the launching of Folded Pipe and UV cured technologies, in addition to CIPP.

Mr. Muenchmeyer teaches, trains and certifies trenchless professionals, provides expert technical opinions for legal disputes and has written numerous industry training manuals and certification programs, articles, papers and specifications for use by the rehabilitation industry.

He is a past president, board member and officer of NASSCO and for 10 years served as Technical Director. He is currently the NASSCO Master Trainer for Cured-in-Place Pipe and Manhole Rehabilitation inspector training programs.

He is a Faculty Member for the Center for Underground Infrastructure Research and Education (CUIRE) and Principal of Muenchmeyer Associates, LLC. Consulting Engineers

He is a co-founder of the Rehabzone, NASSCO's Pipeline assessment & Inspector training programs, the Pipe Rehabilitation Council and the International Pipe Bursting Association

He is a member of the "Order of the Engineer", and the "Select Society of Sanitary Sewer Sleuths".

He was honored as the Trenchless Technology Magazine's 2014 Trenchless Technology Person of the year, honored as 2017 Most Valuable Professional (MVP) by the Underground Construction Technologies Association and chairs and participates in a number of industry technical organizations and committees.
