**PERMA-LINER™  
INDUSTRIES, LLC.**

## **PERMA-LATERAL™**

The Perma-Lateral™ System is designed for 2" – 8" pipe diameters and can be installed through a single access point. 2" to 4" pipes can be rehabilitated up to 120 ft.+ in length, and 5" to 8" pipes can be rehabilitated up to 600 ft.+ in length. Perma-Lateral™ is the best-selling small diameter pipeline rehabilitation system in North America!

### **FEATURES:**

- ASTM F2561 compliant
- 3" to 4" & 4" to 6" pipe flow transitions
- Styrene-free resin
- Can be used to rehabilitate a variety of pipes including cast, clay & PVC
- Minimum 50-year lifespan

### **SYSTEM COMPONENTS:**

- Pivoting Inverter — Allows the installer unlimited angles for optimal inversion head placement
- Patented Camera Inspection Port — Allows a lateral push camera to be inserted inside the clear calibration tube, providing visual verification of the liner placement prior to curing
- Patented Directional Shoes — Allow the installer to direct the liner & calibration tube upstream or downstream while lining through a cleanout
- Patented Scrim-Reinforced Inversion Liner — Eliminates stretch in the liner while inverting, which prevents the liner from protruding past the termination point
