

# Smart Recycling

## Making recycling processes safer and more efficient

### Unitron Connect believes in a circular economy and green energy

Through our close partnership with the leader in the battery recycling industry, we combine +25 years of experience in data collection technology and battery collection and recycling process knowhow.

### Gathering data from collection points in a secure way, assuring safety in storage and transport:

- Polyvalent platform with multi-connection possibility
- Gas, temperature, fill level

### Our purpose-built IoT solution solves the need for:

- Safer storage & transport
- More efficient logistics process for collection of valuable goods
- Collection of info on valuable resources in the field, helping our customer to make better data-driven decisions
