

# AnyTrack

## Collect information of your goods during transport and storage

- What happens to your products during transport and storage?
- Do products or transport devices sometimes get lost?
- Do you sometimes get quality complaints as a result of the logistics process?
- Is it important to monitor the cold chain?
- Do you want to reduce your insurance invoice for the logistics process?
- Do you want to track your goods in- and outdoors?

With **Unitron AnyTrack** we offer an appropriate answer to the above questions. Based on your needs, we start working with standard components and a cloud platform that collects all data for you. Next, we can also integrate this data into your workflow.

### Expensive?

Certainly not. At Unitron we will always start with standard elements as much as possible to come to a cost efficient solution.

# AnyTrack

## 1. Standard Sensor, specifications:

### Power

- Battery 2.600 mAh/3.6V - typical lifetime 5 years
- 12.000 messages

### Communication

- SigFox (RC1)  sigfox
- Up to 50 uplink mssgs/day & 1 downlink mssg/day

### Sensors:

- Temperature
- Accelerometer

### Position

- WPS (Wifi Positioning System)
- Optional BLE
- SigFox Geolocation fallback

### Other:

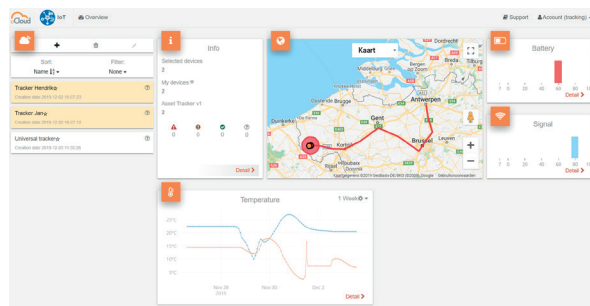

- Weight: 55 gr
- Size: 110 x 32 x 31
- Operating temp: -20°C to 60°C

## 2. Powered by Google Cloud:

- Data transport
- Storage
- Security
- AI

## 3. WebPortal customer-specific adjusted based on existing portal:

## 4. Integration based on standard API's in existing workflows
