

# Smart Construction

## Research driven optimization in construction processes

### Unitron Connect wants to make construction processes smarter

- Industry driven research in connectivity, sensors integration in chemically aggressive environments
- Through intensive research, internally and in collaboration with universities and research institutions, we are developing several solutions which will impact construction processes.
- Partnerships with imec, VLAIO, Ghent University, CRIC-OCCN, WTCB
- CoSMoS ICON project: <https://www.imec.be/nl/research-portfolio/cosmos>

### Research in new techniques that will transform the construction industry

- Drying and hardening process
- Ageing process
- Degradation process
