

MESSAGE FROM THE PROVOST

Dear Colleagues, Stakeholders, Supporters and Friends:

It is an extreme honor and privilege to serve as the Provost and Vice President for Academic Affairs at Florida A&M University (FAMU). This great institution has an extraordinary history and it continues to be a leader in delivering excellence in teaching, research and service.

As we transition to the 2019-2020 academic year, I encourage us all to pause and reflect on the numerous successes achieved by our faculty, students and staff during the previous year.

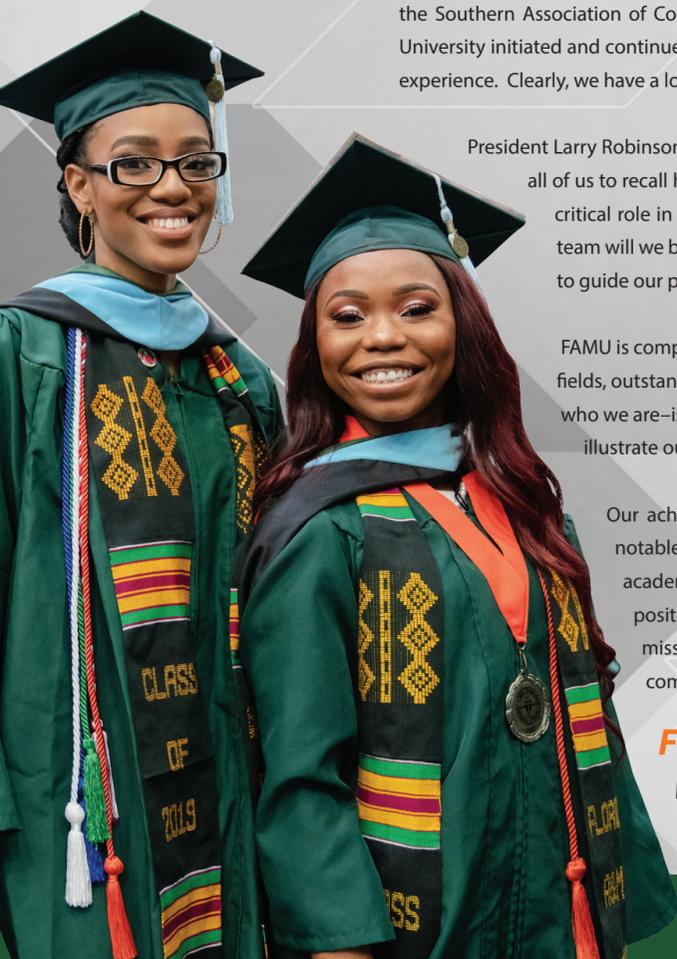

As outlined in this Year in Review, the University's academic enterprise is strong and continues to thrive. Several academic programs garnered national recognition for the outstanding instructional and research efforts of our faculty. Our students earned top awards in several national competitions. The University's accreditation was reaffirmed for another 10 years by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC). The University initiated and continued several major construction projects to enhance the student experience. Clearly, we have a lot to be proud of as members of the FAMU community.

President Larry Robinson continuously reminds us "Together We Rise," and I encourage all of us to recall his message as we perform our daily activities. We each have a critical role in the continued success of this university, and only as a united team will we be able to achieve the ambitious goals that we have established to guide our progress.

FAMU is comprised of excellent faculty, authorities and experts in numerous fields, outstanding students, and dedicated staff. Our priority—the essence of who we are—is providing an exceptional student experience. In doing so, we illustrate our contributions and values to Florida's citizens and the nation.

Our achievements during this past year are as plentiful as they are notable, and they prove FAMU provides a unique, superior and rigorous academic experience. As we highlight our successes, let's use that positive momentum to bolster our ongoing efforts to advance the mission of the University and foster even greater outcomes in the coming year.

Forever rising,
Maurice Edington, Ph.D.
