

IMPAHC | Day 1 | Mon 25 August 2025

Session and theme	Time	Description	Name	Title/topic
Session 1 Cancer risk assessment and stratification	8.45-9.10	Welcome	Laura Forrest	Welcome to IMPAHC and Welcome to Country by local Aboriginal Elder
	9.10-9.50	Keynote speaker	Stephanie Archer	Designing, developing and implementing multifactorial risk assessment tools for hereditary cancers: A CanRisk case study
	9.50-10.10	Oral presentation	Paul James	A randomised controlled trial of polygenic-personalised risk assessment in women undergoing predictive testing for breast cancer predisposition genes
	10.10-10.30	Oral presentation	Laura Forrest	Acceptability of delivering comprehensive breast and ovarian cancer risk assessments to young women in the general population: a qualitative study with stakeholders
Break	10.30-11	Morning tea		
Session 2 Implementation of polygenic information	11-11.20	Oral presentation	Elizabeth Bancroft	Assessment of a polygenic risk score in screening for prostate cancer: The BARCODE1 study Quality of Life Study.
	11.20-11.40	Oral presentation	Sibel Saya	The SCRIPT trial: a randomised controlled trial of a polygenic risk score to tailor colorectal cancer screening in primary care
	11.40-12.00	Oral presentation	Rebecca Purvis	Organisational readiness & leadership for the implementation of polygenic risk scores in the Australian cancer genetics sector
	12-12.20	Oral presentation	Sharne Limb	Do women at increased breast and ovarian cancer risk find a polygenic-informed personalised cancer risk assessment useful? A qualitative study
	12.20-12.35	Oral presentation	Mary-Anne Young	The experiences of women who receive an integrated risk assessment for breast and ovarian cancer through the PRiMo trial
	12.35-12.50	Oral presentation	Georgia Ramsey	The MAGPIE Study: Multi-cancer genomic risk assessment to target screening in general practice
Break	12.50-1.50	Lunch		
Session 3 Access to genetic testing and services	1.50-2.10	Oral presentation	Salma Shickh	Scaling population-based <i>BRCA1/BRCA2</i> testing: early insights from a pilot initiative among the Jewish population in Canada
	2.10-2.30	Oral presentation	Sook Yee Yoon	Cost and other barriers to genetic testing among ovarian cancer patients in Malaysia, a middle-income country in Asia
	2.30-2.50	Oral presentation	Heamanthaa Padmanabhan	Impact of personalised <i>BRCA1/2</i> risk scores on the uptake of genetic counselling and risk perception among breast cancer patients in Asia
	2.50-3.05	Oral presentation	Eveline Bleiker	Experiences of 1,930 men tested for a germline pathogenic variant in <i>BRCA1/2</i>
	3.05-3.20	Oral presentation	Alexandra Roston	Predicting the Inheritance of Pathogenic Variants: An Update on Healthcare Provider Attitudes Towards Parent-of-Origin-Aware Genomic Analysis
Break	3.20-3.50	Afternoon tea		
Session 4 Psychosocial implications of living with inherited cancer	3.50-4.10	Oral presentation	Robyn Smith	Insights from Australians with inherited cancer risk
	4.10-4.25	Oral presentation	Simone Saunders	Discussing genetic testing in the context of breast cancer on TikTok: a qualitative thematic analysis
	4.25-4.40	Oral presentation	Bridget Douglas	Germline genetic findings from tumour sequencing: utility for family members
	4.40-4.55	Oral presentation	Luna Rodriguez Grieve	Australian Adaption of Resources to Communicate Hereditary Cancer Risk with Family Members
	4.55-5.00	Day 1 close	LOC	Instructions about evening mixer at Husk
	5.30 onwards	Networking mixer		Buses depart Mantra at [time TBC] to Husk Distillery Buses return to Mantra
