

Eye Protection

The right eye protection is vital for employees at all times, and Proguard's range of general safety eyewear and accessories meet these needs. It will protect the user eyesight and reduce risk of casualties in the workplace.

SAFETY SPECTACLES

Spectacles are eye protector designed to shield the wearer's eye from hazards. Spectacles may in many cases to be use alone. When faceshields are required, safety eyewear or goggle is recommended to be worn in conjunction with the faceshield

SAFETY GOGGLE

Goggles are eye protector intended to fit immediate surrounding of the eyes in order to shield the eyes from variety of hazards. While goggles may used alone, they may used in conjunction with other protectors.

HOW TO DECIDE WHICH EYE PROTECTION IS RIGHT FOR THE JOB :

- **Risk** : Assess the potential risk and level of protection required such as impact, debris, splash, and others.

- **Special features** : Think about the need for special features such as anti scratch, anti fog, suitable shades, and others.
- **Environment** : Will the wearer be exposed to climate variation such as humidity, temperature, brightness.
- **Fit** : Ensure a good fit.
- **Comfort** : Think about the length of wear time - this governs the level of user comfort required.
- **Vision quality** : Does the wearer need general or prescription lenses?
- **Integration** : Will safety glasses be worn with other PPE such as hearing protection and respiratory protection.
- **Style** : What is the wearer's preferred style?

Choosing the right safety eyewear

The European Standard EN 166 lays down the specification for protective glasses, googles and visors including the mechanical strength, field of use and optical performance. Use the table here to decide what product best suits your requirement:

Requirements relating to eyewear marking Standard EN 166									
Type of Eye Protector	Mechanical Strength (Impact Speed of Ball)				Field of use				
	Increased robustness impact velocity 12m/s	Low-energy impact velocity 45m/s	Medium-energy impact velocity 120m/s	High-energy impact velocity 190m/s	Liquid, droplets and splashes	Large dust particles	Gas and fine dust particles	Molten metal and hot solids	Optical Performance (class)
Spectacles	✓	✓	✗	✗	✗	✗	✗	✗	1
Goggles	✓	✓	✓	✗	✓	✓	✓	✓	1
Face Shields	✓	✓	✓	✓	✓	✗	✗	✓	1
Symbol on lens	S	F	B	A				9	
Symbol on frame	-	-F	-B	-A	3	4	5	9
