

ActiveStart

By Active Controls

Quick Start Guide ACS20P

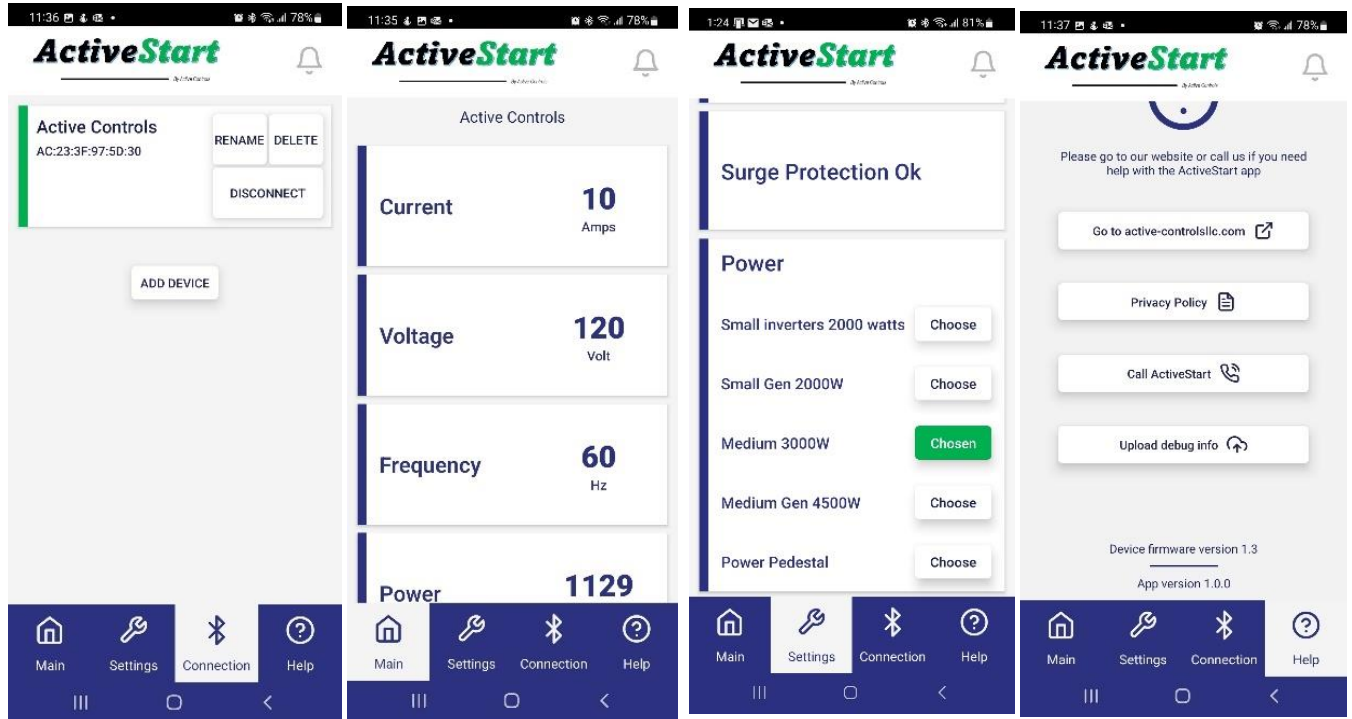

Instructions:

1. Plug Unit into approved 120/15A Power Receptacle
2. Generators have Ground and Neutral floating. Bonding Plug is available but not required for our unit to work correctly.
3. Plug RV or Camper Power Cord into the ActiveStart. There is a delay before output receptacle light is illuminated.
4. Operate RV or camper normally.

Download our app from the Apple or Android app stores. Search for ActiveStart and follow steps below:

1. Add New Device from the connections Screen once the unit is powered ON.
2. App will search for available devices.
3. Select device from list of found devices shown as a mac address. **Ex of MAC Address AC:23:3F:97:XXXX**
4. The device has a unique pass **key** on the sticker on the back of the unit. **Ex of Key: me5YPU**
 - a. **Hint: Use your QR reader app to read the label and do a copy paste of the key into the app to eliminate any mistakes in reading the letters or numbers. Apple users please use 3rd party QR reader if camera reads "no usable data found".**
5. Once the pass key is entered the device will show voltage and other information on the main screen. Visit our website for complete instructions if needed: Active-Controlsllc.com
