

ActiveStart

By Active Controls

Quick Start Guide ACS50Px

Instructions:

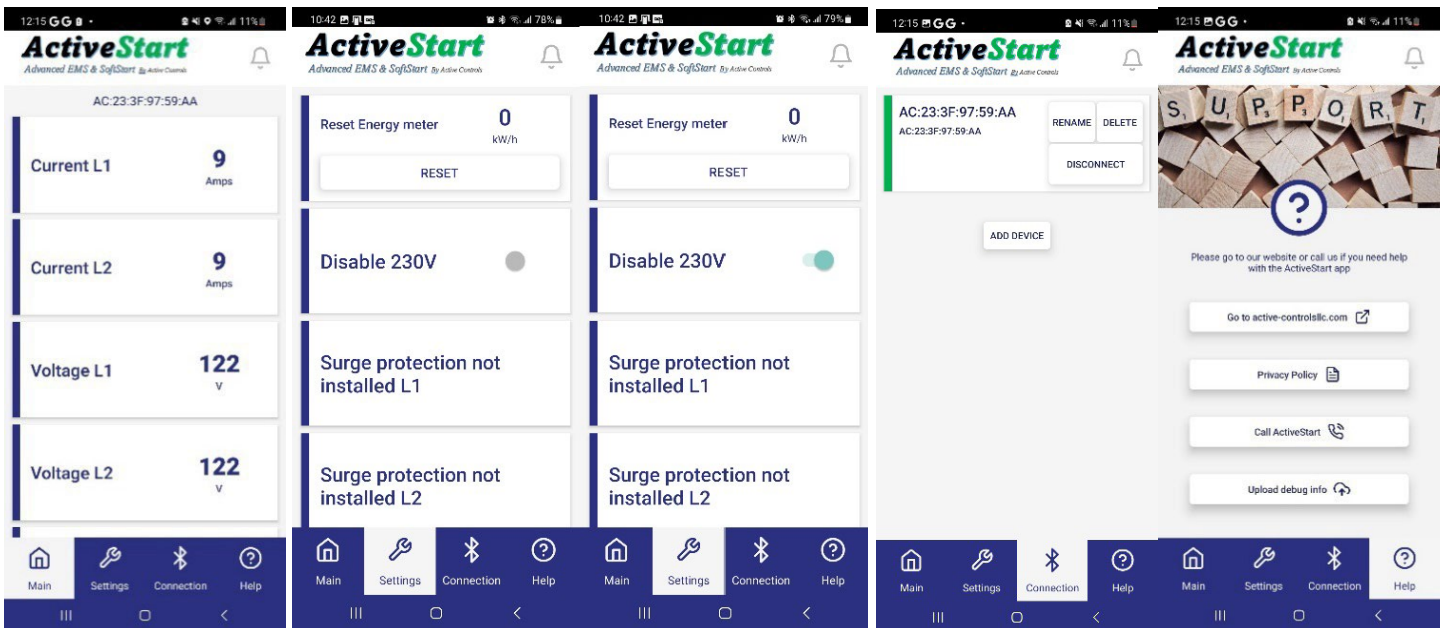

1. Plug Unit into approved 120/30A with DogBone or 230/50A RV Power Receptacle.
2. Verify LED's indicate "Correct Wiring". If not, correct issue.
 - a. Generators have Ground and Neutral floating so unit will indicate reverse polarity. Please use the available bonding plug to correct the issue when using a generator.
3. Plug RV Power Cord into the ActiveStart. There is a delay before output live.
4. Operate RV normally.

Download our app from the Apple or Android app stores. Search for Advanced EMS and Softstart or scan QR code to download and follow steps below:

1. Add New Device from the connections Screen once the unit is powered ON.
2. App will search for available devices.
3. Select device from list of found devices shown as a mac address.
4. The device has a unique pass key on the sticker on the neck (top of unit by plug) of the unit.
Ex of Key: WX5ja8
 - a. **Hint: Use your QR reader app to read the label and do a copy paste of the key into the app to eliminate any mistakes in reading the letters or numbers.**
 - b. Once the pass key is entered the device will show voltage and other information on the main screen.
