

ActiveStart

By Active Controls

Quick Start Guide ACS30M

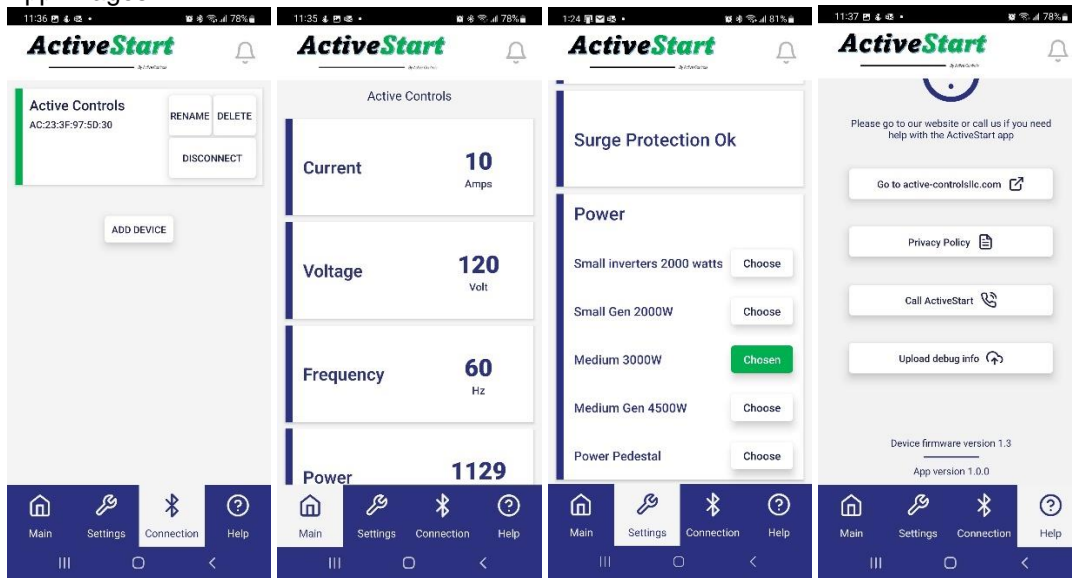

Instructions:

1. Plug Unit into approved 120/30A NEMA Marine Power Receptacle.
2. Verify Green LED is lit indicating Power is coming into the unit.
3. Plug RV or Marine Power Cord into the ActiveStart. There is a delay before output LED is Green.
4. Operate Boat normally.

Download our app from the Apple or Android app stores. Search for ActiveStart and follow steps below:

1. Add New Device from the connections Screen once the unit is powered ON.
2. App will search for available devices.
3. Select device from list of found devices shown as a mac address.
4. The device has a unique pass key on the sticker on the back of the unit.
 - a. Hint: Use your QR reader app to read the label and do a copy paste of the key into the app to eliminate any mistakes in reading the letters or numbers.
5. Once the pass key is entered the device will show voltage and other information on the main screen. Visit our website for complete instructions if needed: Active-Controlsllc.com
