The possibility for the operator is counting and banding at the same time

Mabas sbm-95 is the second generation of Mabas sbm machine series, which presents a money banding with no analogues

This unit is designed for easy, fast and secure principles. Qualities that distinguishes this machine from others is automatical money pusher and print on a roll. It's the unique machine in the world with such opportunities.

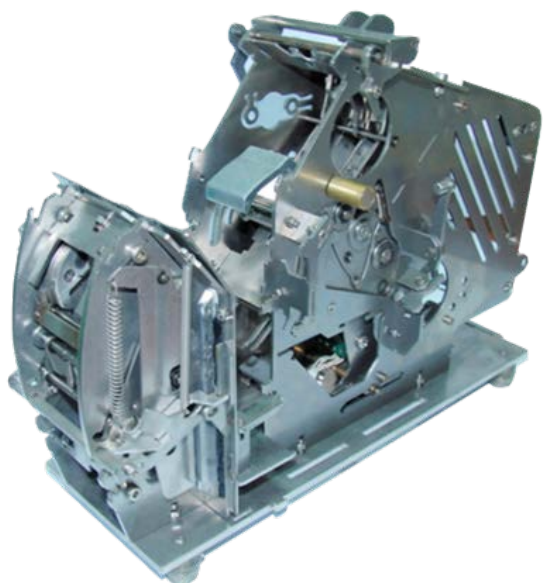

What is the automatic pusher?

All simple banding machines need to manually insert a wad of money in the pocket of the machine, wait for the process and then remove. Unlike the rest banding machines, sbm-95 works as follow: put a pack in its

pocket and forget, as the machine automatically pushes the wad of money after banding process. As the result an operator wastes less time on money banding and can easily watch the counting machine's process, since an operator simultaneously without any effort can do his job on the counter and banding. And there is no need for another operator for banding. In terms of ergonomics, the machine is very compact and there is no need for a separate table, it can be safely placed next to a counter.

Mabas sbm-95 has fully metallic construction. In its manufacture was used all entrusted units and aggregates that served to create smb 95 as heavy-duty, reliable and guarantee for both quality and error-free operation.

This unique machine despite of a compact size can print the bank's name, branch's name, the operator's name and the exact time till second. Only large and very expensive machines placed in all the world's central banks have this feature. Print function provides full control of the process in the case of fraud, loss of money or fake, so it's easy to find where this pack came from and through the camera to find the culprit.

BANDING SIZE	<i>Banknote package size (up to 200 banknotes)</i>
<i>Height</i>	<i>60 - 90 mm</i>
<i>Width</i>	<i>25 mm</i>
<i>Length</i>	<i>90 mm or more</i>
BANDING TAPE	<i>PE – coated paper</i>
<i>Width</i>	<i>40 mm</i>
<i>Reel inner diameter</i>	<i>50 mm</i>
BANDING SPEED	<i>15 banding cycles per minute or more</i>
POWER	<i>DC 24 V max : 80 W (2 motors and heater on)</i>
<i>Standby</i>	<i>5 W (all off) / 30 W (heater on)</i>
<i>External</i>	<i>AC / DC – adapter in delivery included</i>
NOISE LEVEL	<i>less than 42 dB (A)</i>
WEIGHT	<i>11 kg (without paper reel)</i>
DIMENSIONS	<i>length x width x height 400 x 112 x 245 mm</i>
PRINTER CARTIDGE	<i>HP 51645 A (42 ml)</i>
