Sophos Mobile

Improve productivity with simpler Unified Endpoint Management Sophos Mobile is a Unified Endpoint Management (UEM) and Mobile Threat Defense (MTD) solution that helps businesses spend less time and effort to manage and secure traditional and mobile endpoints. Our next-gen cybersecurity platform, Sophos Central, enables you to secure iOS, Android, Chrome OS, Windows 10, and macOS devices through a single interface.

Unified Endpoint Management

Manage and secure corporate-owned or personal Windows 10, macOS, and mobile endpoints through one system for a simpler management strategy, ensuring uniform company security policies and secure access to company assets. For maximum productivity, organizations where BYOD is embraced can apply consistent policies regardless of device type or ownership. And, because everything we do at Sophos is about security, Sophos Mobile will keep business data, users, and their mobile devices protected and secure.

Mobile Threat Defense

Establish a robust line of defense at the mobile device level with industry-leading threat protection. Powered by Sophos' deep learning technology, Intercept X for Mobile provides an award-winning level of protection, guarding against the latest mobile threats such as ransomware, network attacks, and exploits. Enforce company policies with compliance checks that will automatically restrict access to business resources or initiate remediating actions in case of violations. Part of Sophos Central, our cloud-based platform for all Sophos products, Sophos Mobile helps customers secure mobile devices side-by-side with desktop, server, and network platforms.

Keep business data protected and personal data private

Protect and secure business data on personal or company-owned mobile devices. To make sure that business data is safe and personal information is private, Sophos Mobile supports BYOD environments through the Android Enterprise Work Profile and iOS User Enrolment modes of management. Deploy corporate email and apps to a device and feel safe in the knowledge these remain separate from a user's personal data, enabling productivity without compromising security. Admins retain control over corporate content without intruding on the users' privacy.

Highlights

➡ Comprehensive UEM solution

➡ Manage iOS and Android smartphones and tablets

➡ Manage Windows 10, Chromebooks, and macOS computers

➡ Manage and configure Microsoft Office 365 apps on iOS and Android devices

➡ Cloud-managed through Sophos Central

➡ Full device management for corporate devices or container management for BYOD devices

➡ Extensive support for Android zero touch and Apple DEP

➡ Flexible self-service portal

➡ Award-winning protection

SOPHOS

Value

Sophos Mobile enables customers to be up and running in minutes. The intuitive admin workflow, together with the flexible self-service portal, means admins will spend less time on the day-to-day tasks of securing and managing traditional and mobile endpoints, leading to a lower total cost of ownership. Sophos Mobile is licensed per user and delivers great value, enabling companies to manage and secure the devices of the whole organization without overspending on underutilized features.

Security Ecosystem

Sophos Central, our cloud-based management platform for all Sophos products, lets organizations manage their mobile, endpoint, server, and network security through a single console. Cross-platform visibility enables faster incident response and more streamlined administration.

Extended Detection and Response (XDR)

Expand your organization's visibility by incorporating Android, iOS and Chrome OS threat and management data into Sophos XDR. Perform detailed threat hunting and IT ops tasks.

➡ Check devices for vulnerabilities or unwanted apps
➡ Locate devices that are unpatched or have out of date software
➡ Investigate and respond across mobile, endpoint, network, email, cloud and server data from a single console
