

ORGANIZATIONAL EXCELLENCE

Every organization has room for improvement and the best organizations in the world know this. Whether your organization is best-in-class, holding its own, or struggling to adequately address challenges, Flying W Consulting has something for you.

Our signature program is called Comprehensive Organizational Resource Enhancement - or CORE. This program explores the major aspects of your organization utilizing a mix of data gathering, business analytics, academic research, and proven best practices to develop a customized and comprehensive strategic plan filled with realistic solutions.

The goal of CORE is **RESULTS** and we have a trail of successes across the globe applying these principles to businesses, military units, governmental agencies, and faith-based organizations. CORE works!

Flying W brings its consultants to you and works with the organization's leadership to find relative weaknesses and simultaneously address concerns. Along the way, our consultants use a combination of real-world experiences and academic expertise to dynamically assess your organization's health and engage in open and honest conversations. These conversations always lead to practical and creative ways to achieve goals while also helping to move your organization's people-mission-infrastructure to a better place. We will not be satisfied until your organization has a well-defined path to the next level!

The following areas are some of the most popular areas of engagement:

Leading People	Goal Setting
SWOT Analysis	Culture Assessments
Strategic Foresight	Strategic Assessments
Managing Infrastructure	Strategy Development
Debriefing and Follow-up	Mission Accomplishment

Let us apply CORE to your organization and get ready to soar!
