

Modules and Devices

PATQER also offers modules that are ready to be integrated into various devices (e.g., camera, microscope or photodetection systems) to increase their functionality and make them “smarter”.

In addition, we are also offering “ready-to-use” devices, such as smart cameras.

Our modules are currently only available to a very limited number of customers. Nonetheless, you are welcome to contact us (info@patqer.com) and we will consider your inquiry.
