

## Education

We recommend reading the following books in order to have a better understanding of the field of activities in which PATQER operates:

- *Smart Mini-Cameras*, by: T. V. Galstian, 2014.
- *Bases de la photonique*, by: T. Galstian, 2020.

If you are unable to find these books, please feel free to contact us ([info@patqer.com](mailto:info@patqer.com)) and we will gladly provide assistance.
