## GVC-18000 – Continuous Steam Power

The GVC-18000 dry steam cleaner is ideal cleaning equipment for food and beverage production facilities. The machine makes cleaning and sanitizing production and packaging equipment easier, all thanks to its powerful dry steam.

Our system delivers high pressure up to 9,9 BAR (145 PSI) and heat up to 143.3 °C (290 °F) to break down soils like fats, sugars, heavy buildup, and allergens on contact helping you to consistently deliver the results you need as part of your plant SSOPs. It also helps to kill yeast, mold, pathogenic bacteria, and other dangerous or spoilage microorganisms.

Plus, dry steam cleaning provides the benefit of targeted cleaning in dry environments, water sensitive equipment, hard to reach areas, and other challenging applications where traditional dry cleaning methods simply can't produce the results you need.

# GOODBYE TO DIRT, BACTERIA AND ALLERGENS!

## GVC-36000 – Heavy-Duty Power with Superior Results

We've paired the convenience of mobility with the power one would expect from a stationary unit. Take on virtually any large scale cleaning project with nearly 0,9 liters (0.25 gallons) of dry saturated steam per minute.

On demand, industrial strength dry steam eliminates bacteria, viruses and microorganisms. Reduce cleaning time and lower production down time. Clean your facility to the highest level of hygiene available in the cleaning industry. Powerful enough for production lines, yet gentle on machinery and electronics.
