

CLEANING OVERHEAD AREAS HAS NEVER BEEN SAFER OR EASIER

Carbon Fiber Vacuum Accessory Kit

In food processing facilities, dust accumulation can pose a food safety and quality risk. Due to its complexity, labor intensity, and high cost, overhead dust removal has been overlooked historically. Dust can settle on a variety of surfaces, including overhead piping, support beams, and HVAC systems. As these areas are typically out of sight and out of mind, they become potential pest infestation areas, yeast/mold growth areas, and pose a risk of debris falling onto production surfaces. Carbon fiber vacuum extensions and tools from Goodway offer a lightweight and safe cleaning solution. These anti-static wands and conductive tools enable you to reach those hidden areas without adding costs, safety risks, and labor time associated with using ladders or scissor lifts. Their lightweight, easy-to-handle design makes them ideal for accessing pipes, support beams, and other areas from the ground.

Independently certified to be compliant with NFPA standards 484, 652, 654, ATEX 2014/34/EU*.

*Certified when used with a suitable, independently certified and approved vacuum system.

VAC-KIT-DIV2-D: (For DV vacuums), includes one carry bag..... **Call for Price**

VAC-KIT-DIV2-T: (For VAC-EX, VAC-2, VAC-3, AV-1200, and GTC-540 vacuums), includes one carry bag..... **Call for Price**

VAC-DIV2-100: 4' interconnecting extension pole..... **Call for Price**

FEATURES

- Lightweight and effective
- Fully conductive
- Tested and certified to NFPA* and ATEX* standards
- Anti-static construction
- Reduce labor costs by completing cleaning quickly
- Clean hard-to-reach places
- Variety of attachments for multiple applications

IDEAL FOR:

- Bakeries
- Confectionery
- Dry Ingredients
- Spices
- Flour Mills
- Powdered Beverages
- Dry Pet Food
- Overhead Dust
