The **INTERVIEW** can be done on the same visit as the testing visit and is the 4th step in completing your enrollment. The interview will simply be a conversation about any concerns you may have about your child attending CCA and questions you may have about our school. Also during the interview, CCA admissions will address any concerns they may have regarding your child's ability to be successful at CCA. CCA will also use this time to review our statement of our faith, educational philosophy, mission statement, and purpose of our school. (Note: Because of our limited staff, small class sizes, and rigorous curriculum, CCA is not equipped at this time to properly educate all children with special needs.)
