

We have a homeless crisis in Thurston County

People are living in encampments, staying in shelters, and looking for safe places to sleep. People are falling through holes in our society's safety net.

- Every person needs and wants a warm, dry, safe place to sleep.
- People can't easily solve problems unless their basic needs are met.
- People of faith are called to work together to make sure all God's children are sheltered and cared for.

Tiny Houses in faith communities ?

Nationwide, faith communities are working together with proven solutions for unsheltered persons by building tiny homes and supportive communities.

Faith Alliance Initiative for Tiny Houses

Faith Alliance Initiative for Tiny Houses (FAITH) is a local group of diverse faith communities who are actively working to create tiny house facilities on faith community property.

- FAITH is rooted in caring for all of God's children.
- FAITH is committed to creating a safe and healing community for all.
- FAITH has technical support, sample policies, building plans, sources of materials and strategies that will work in your community to create local partnerships that have lasting impacts & growth in people's lives.

Let's work together through loving, respectful relationships that create community and change.

Join members of other faith communities to create tiny homes housing!
