

What is **OXY PLUS**?

A BREAKTHROUGH  
SKIN-CARE TREATMENT

SKIN EXFOLIATION  
SKIN OXYGENATION  
SKIN NOURISHMENT

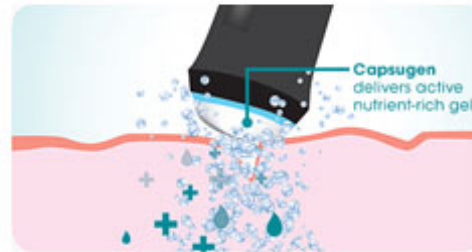

- ✓ Provides the only **4-in-1** innovative **Superb Facial**
- ✓ Patented and clinically proven
- ✓ **OXY PLUS** technology results in unparalleled skin resurface – **skin oxygenation, skin exfoliation & skin nourishment, infusion** of actives to enrich the skin for smoother complexion and younger looking skin.
- ✓ Results are seen after only one treatment.

# OXY PLUS Technology

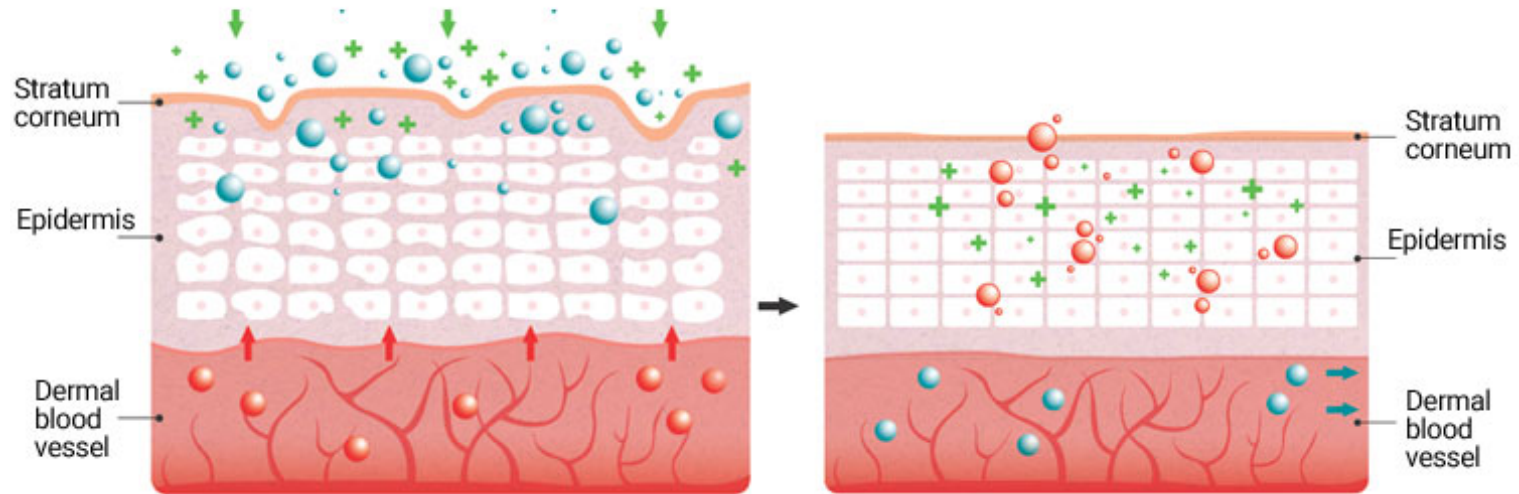

## 1. EXFOLIATE

## 2. INFUSE

## 3. OXYGENATE

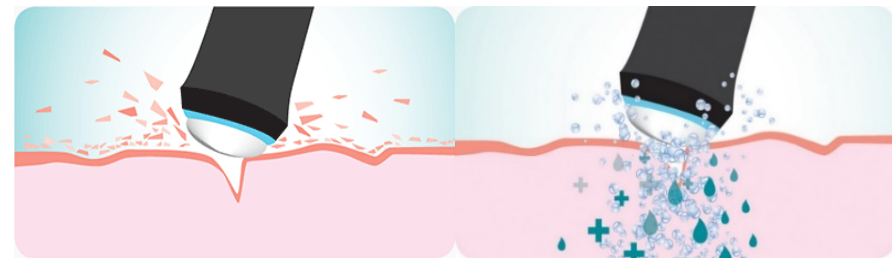

+ Active ingredients    ● O<sub>2</sub>    ● CO<sub>2</sub>    ● ●

## FOUR aspects of an **OXY PLUS** treatment are: OXY PLUS

### 1) EXFOLIATION

- The first oxygen + exfoliate the upper skin layer to remove dead cells, smooth and renew the skin, and prepares it to receive active nutrients. 素
- Safe on all skin tones and can treat sensitive skin without irritation.

FOUR aspects of an **OXY PLUS** treatment are:

## 2) OXYGENATION

- The **OXY PLUS** produces CO<sub>2</sub> bubbles which gently burst on the skin's surface creating a physiological response that sends oxygen-rich blood to the area, increasing capillary flow and skin metabolism.
- Oxygenation results in optimal absorption of active ingredients.

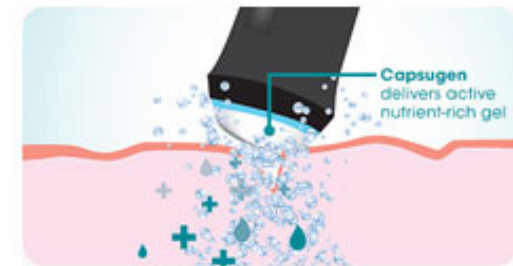

## HOW DO THESE RED BLOOD CELLS KNOW WHERE TO RELEASE MORE AND WHERE

Carbon dioxide (CO<sub>2</sub>) is the key player in Oxygen (O<sub>2</sub>) transport

### 3) INFUSION

- Through our exclusive Capsule Gel, cleanses the skin while infusing nutrient-rich active ingredients.
- Choose between the treatment for rejuvenation and anti-aging or treatment for skin brightening and texture improvement.

### ULTRASOUND TECHNOLOGY

- To penetrate deep below the surface of the skin, promoting cellular renewal and repair, increasing circulation, and improving skin care products penetration.

## TRIPOLAR RF TECHNOLOGY

- TriPolar RF is clinically proven to simultaneously and homogeneously heat both superficial (dermal) and deep (hypodermal) layers.
- TriPolar RF uses 3 or more electrodes conductive RF to the skin.
- Volumetric heating generates clinical effect
- TriPolar RF functions deliver immediate visible facial contouring effects – smooth and tightening skin – fine line and wrinkles reduction – improved skin texture

#### 4) HOT & COLD HAMMER

- The hot and cold hammer massage is a facial treatment tool, with both sides of the hammer head reaching different temperatures (one hot, one cold) simultaneously.
- The hot side of the hammer relaxes and opens pores while stimulating blood circulation beneath the skin.
- The cold side soothes tired and overheated skin, and closes pores while locking moisture into the skin

# OXY PLUS Treatment

One Course 6 times Treatment

After a month, make the treatment once a month

## OXY PLUS Treatment Benefits
