

# R1 Electroporation

Dual action of Radio Frequency & Electroporation  
Professional Beauty Device

# R1 Skin Recovery

- Radio Frequency Facial treatment, radio waves penetrate the outer skin layers, delivering heat energy to the muscles and tissue beneath.
- This treatment is FDA-approved as a non-surgical treatment for wrinkles and skin firming.
- It is non-invasive, no downtime or no recovery time.
- Results are immediately noticeable, and they become even more, in the weeks following the treatment as the build-up of collagen stimulates further skin contraction.

Electroporation is a painless, non-invasive treatment for better skin with no side effects.

Here's why electroporation is a good option:

- There is no electrical contact with the patient, no chemical burn hazard, muscular fasciculation, pain or swelling.
- It administers non-ionic lipophilic and hydrophilic substances.
- It does not need a conductive gel.
- It is a practical and user-friendly method.
- It results of the treatment remain effective for long.

## Benefits

- ☆ Hydrating – skin supple and luminous
- ☆ Moisturising – moist, fine pore and smooth
- ☆ Brightening– improve the dark spots, dull & tired skin
- ☆ Firming / Tightening– stimulate the growth of collagen, regain its elasticity, diminish wrinkles.
