# MEDEX 4D SMART IR – RF

## Treatment Principle

### 1. Vacuum and Suction Technologies

- Able to vacuum the skin up to different level
- Helps the energy level deep penetration and better working on Subcutaneous Tissue
- Improves blood circulation and metabolism
- Relax the skin and muscle to reduce fatigue and weak

## Treatment Principle

### 2. Radio Frequency Technology

- Working on the skin by warm the collagen fiber up to 55 °C
- Stimulate and build the collagen growing again gradually
- Improves blood circulation and metabolism
- Achieve skin tightening and lifting result

## Treatment Principle

### 3. 650nm Red light & Infrared light

- Accelerate the vessel and stimulate blood circulation and lymphatic system
- Supply more oxygen to the cells
- Eliminate fats in the subcutaneous layer
- Helps to loose weight and body shaping
