

PICO LASER

Time To Get You Skin Instantly

- Cleaner
- Brighter
- Firmer

DISCOVER PICO LASER TECHNOLOGIES

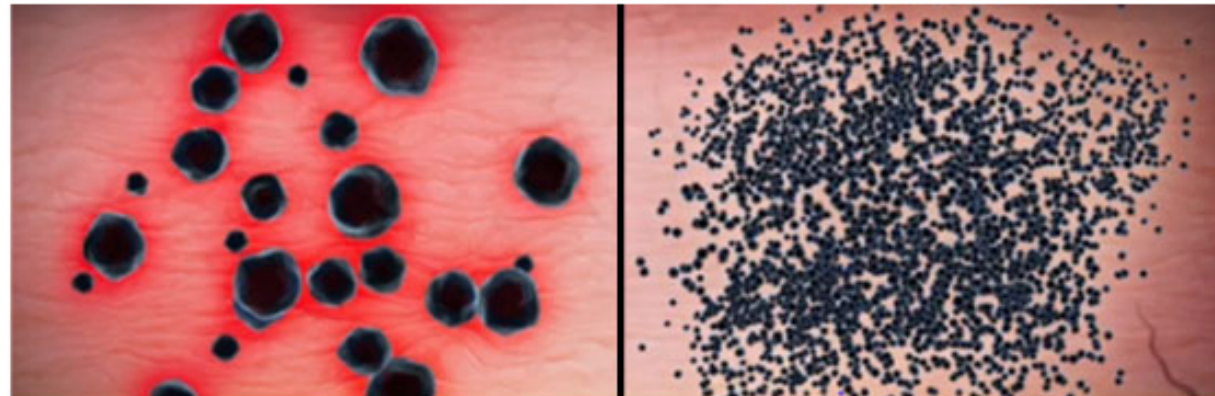

PICO LASER uses the most advanced laser technology for the treatment of pigmentation and aged skin, and for tattoo removal.

Standing out from the **Fractional Lasers** that breaks down the pigmented particles into granules.

PICO LASER works in picosecond pulses, fragmenting the particles into a really thin “**dust-like**” and breaks up melanin and pigment particles.

The procedure is **safe, simple, comfortable, and fast.**

Laser breaks melanin granules

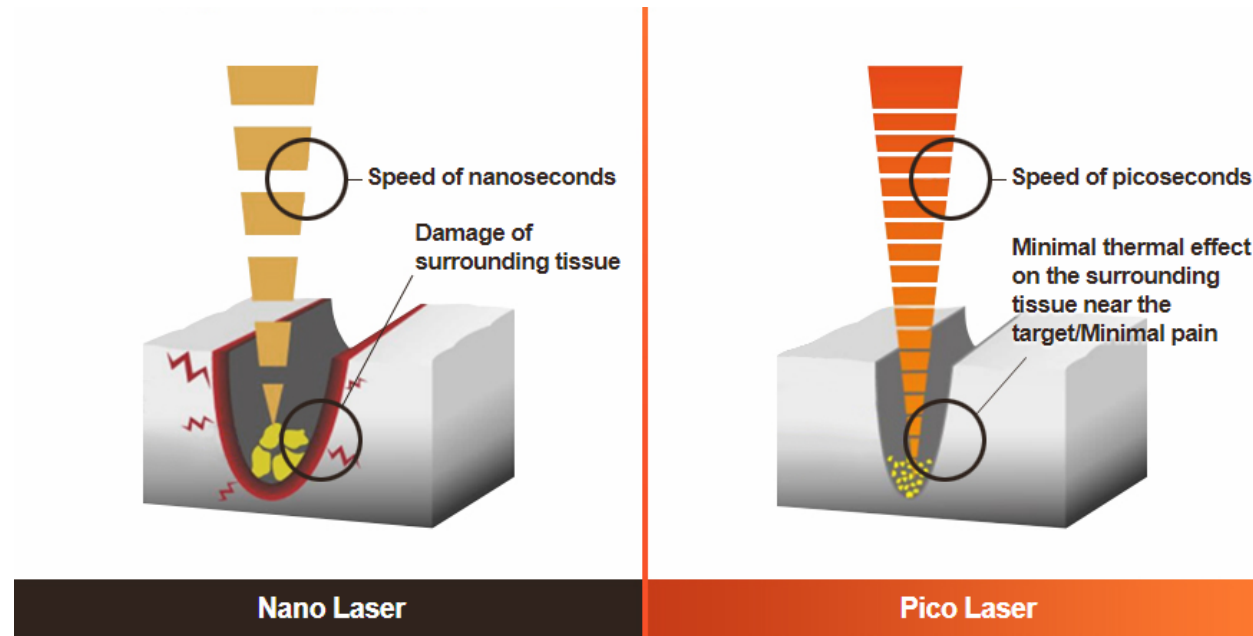

DISCOVER PICO LASER HEAT GENERATION

PICO LASER are able to **more quickly penetrate** the skin in a shorter period of time due to the increased power.

This prevents the laser from heating up from long exposure periods on your skin and will not cause redness and prevent burning

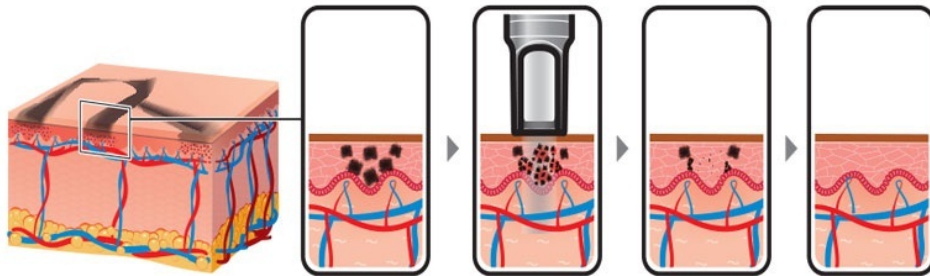

Treatments are **less painful** and are able to **recover** in a **much shorter period**

PICO LASER WORKING PRINCIPLE

TREATMENT THEORY

PICO LASER users ultra-short pulses to hit the melanin with a great pressure, the melanin shatters into tiny particles. They are more readily absorbed and eliminated by the body.

PICO LASER is a quick and easy non-surgical, non-invasive laser skin treatment for the body including chest or decollete, face, hands, legs and more

TREATMENT RESULTS

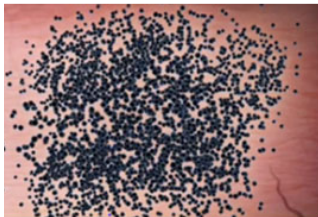

PICO LASER machine with higher peak power better selective photothermolysis make tattoo and pigmentation removal treatment process speed 5-10 times, reduced to 2-4 times.

THE DIFFERENCE BETWEEN **PICO LASER** AND TRADITIONAL LASER

① HOW THEY WORK

PICO LASER

Pico Laser treatments are high-energy output to effectively treat even the most stubborn skin irregularities.

Traditional Laser

Traditional Laser treatments are limited by the amount of light and speed they use, which influences the types of skin irregularities they can treat
