# Alto Summer School's Key to Fun

## Creativity ~Build it up with your own ideas~

At Alto Summer School, we value the process of children's thinking. Children enjoy and immerse themselves in the program because it allows each child to freely express his/her ideas, rather than doing a predetermined activity. Alto's classes are small, and by providing appropriate support to help each child realize what he or she wants to do, we nurture the children's creativity and ability to carry through to the end.

## Cooperations ~working together with friends~

The experience of working with friends to accomplish a goal is different from the feeling of accomplishment that comes from working alone, and at Alto Summer School, we work together to achieve a big goal that would be difficult to reach alone. The unique cooperation that can only occur in a mixed-age class is another attraction of this program.

## Japanese Culture ~First Time Learning and Experiencing~

There are so many different traditions and cultures throughout Japan that you cannot experience even if you live in Japan. We will carefully study the history, characteristics, and production methods of each of these. In addition, we will not only learn the Japanese language, but also create using the Japanese language.

# Alto Summer School 2025
