

Concealed Carry and Home Defense

Learn the fundamentals of personal and home defense in a course designed by the United States Concealed Carry Association. This is a **MUST** class for new firearm owners planning to defend themselves at home or when out and about, and for individuals planning on getting a Concealed Carry License (Georgia Weapons Carry License).

Most Concealed Carry classes focus on the applicable law and don't spend enough time on other critical aspects of defensive shooting. This comprehensive class will help you understand the facts regarding defensive Firearm use, situational awareness, shooting fundamentals, legal aspects of using deadly force, what to do after a Critical Dynamic Incident, and a complete guide on gear and ongoing training.

You will learn how to develop a personal and home protection plan, firearms safety, shooting fundamentals, legal use of force, police interaction, violent encounters and their aftermath, gear and gadgets, and how to apply for your Concealed Carry License. This class does not include live fire, but you will have the opportunity to sign-up for a Shooting Lesson with one of our highly qualified firearms instructors.

- Class is 4-5 hours long
- Receive a 245-page color book / course study guide (\$35 value)
- Personalized certificate of completion
- Also receive additional discounts for future classes
