

To Whom It May Concern:

This letter is my personal recommendation for Karlene Minea. I had worked with Karlene here at GMN with the Aerospace Business Segment. In every interaction, I found her to be consistently professional, punctual, and a creative problem solver.

In addition to being a dependable asset to the team, Karlene was always offering creative and insightful cost-saving ideas to implement. She was able to communicate effectively throughout all departments within the organization to achieve our collaborative tasks successfully.

During our time working together, she was also instrumental helping many challenging new statements of work get from inception to completion. It was a pleasure watching her advance from Screen Printing into our Quality Department. She also was highly participative in our Value Stream Team Improvement Projects. As soon as one program was completed, she was looking for the next way to add value to the organization. I strongly and earnestly recommend Karlene for any position within your organization. Her influence and contributions still resonate within our team. She is a bright and talented professional, and her pleasant demeanor will be an asset to any Team.

Please feel free to contact me directly with any questions regarding Karlene, at 206-284-5719 or paulm@gmnaerospace.com and I will be glad to help.

Best Regards,
Paul Michaels
