

MAKE A HALLOWEEN GHOST

- White fabric - cheese cloth also works very well
- Craft glue (tip, if you use glow in the dark glue, you will have a glow in the dark ghost!!)
- Plastic cup or bottle (this will serve as the form for your ghost)
- Googly eyes (optional)
- Black paint
- Silver glitter (optional)

FIRST, measure and cut your white fabric so that it will completely cover your plastic cup or bottle,

NEXT, coat the fabric with glue. Place the fabric in a cup or bowl with a generous amount of glue. You may need to use your fingers. It is important that the fabric is completely saturated with glue.

THEN, cover your cup or bottle with the glue coated fabric and allow to dry completely. If you choose to use glitter, now is the time to sparkle it up!! - while the glue is still wet.

ONCE THE GLUE IS DRY, add the googly eyes or paint eyes and paint a spooky mouth.

GENTLY remove the cup or bottle. At this point it should stand on its own, or you can add a string so you can hang your ghost up!!

MAKE A HALLOWEEN BAT

WHAT YOU WILL NEED:

- A coffee filter
- Scissors
- Black and purple washable markers
- A clothespin
- Black paint
- White paint pen (optional)
- Googly eyes
- Water

FIRST, fold your coffee filter in half and cut triangles around the curved edge.

NEXT, use the black and purple markers to color a design on the coffee filter.

THEN, dip the paintbrush in water and use it to lightly paint the coffee filter until the marker colors bleed together.

ALLOW to dry completely.

MEANWHILE, paint the clothes pin black and add the googly eyes with glue, and allow to dry.

ONCE EVERYTHING is dry, add a vampire mouth with the paint pen, accordion-fold the coffee filter and place it in the clothespin.
