Virtual sessions brought to your students in a live, instructor-led format are also available. AFV Educate can also create custom programs tailored specifically to meet your needs.

AFV Educate, a 501(c)(3) not-for-profit education and technology company that focuses on developing and presenting training to first responders, second responders and the automotive training industries, has launched a unique program to support the needs of the Clean Cities Coalition network.

AFV Educate's area of expertise is in developing and producing relevant content for alternative fuel vehicle training, including for the audiences of Firefighters, Law Enforcement, Emergency Medical Services, automotive technicians, and the secondary and post-secondary school market.

This content is delivered through multiple mediums, including instructor-led, live on-site classes, live and recorded internet-based video presentations, and other applicable formats.

Taught by industry-recognized instructors, AFV Educate courses

are available on-site in your area at very competitive pricing.

AFV Educate is also very aggressive in researching and applying for federal and state grants that benefit the communities we serve, and look to include our Clean Cities partners in these solicitation responses. We are also open to working with you on inclusion into your grants in a support role. As a not-for-profit, we can develop and present materials requested and offer an attractive cost-share percentage.

Chris Womock

**Indianapolis Fire Captain &
First Responder Trainer**

PROGRAM SUPPORT TEAM

AFV Educate is very proud of the team assembled to support you and this program. Bringing over 20 years combined service to Clean Cities, key personnel supporting this program include:

Firefighter Chris Womock, Captain, Indianapolis Fire and AFV Educate Director of Training – Chris is our country's leading alternative fuel emergency services training instructor and has been teaching first and second-responder alternative fuel vehicle classes for over eight years, with many of his presentations to Clean Cities. Chris is a founding member of AFV Educate and is excited to bring his extensive skills to this program.

Micheal Smyth, AFV Educate Director of Education – Mike has extensive experience working with Clean Cities from his time at the National Alternative Fuels Training Consortium (NAFTC) at West Virginia University and as Director of Training with Automotive Video Innovations, Inc. Mike brings his curriculum development experience and project management skills to the AFV Educate program.

TESTIMONIALS

Louisiana Clean Fuels and I have worked with Chris Womock on multiple training events, and it is easy to see why he is recognized as a leader in alternative fuel vehicle training. Not only does Chris have a great rapport with his fellow responders in the classroom, but he stays current on the latest technologies and brings that knowledge to his teaching.

Ann Vail

**Executive Director and Clean Cities Coordinator
Louisiana Clean Fuels**

Firefighter Chris Womock lectured at our county-wide cooperative training on operating in emergencies involving alternative fuel vehicles. The instructor made the information relatable to our industry and was engaging throughout. While the sessions were condensed, the abundance of information was great! We will be continuing with his whole class, and the AFV Educate hands-on AFV firefighter extrication class. Fantastic program and instructors!

John Nichols

**Training Captain, Bonita Springs Fire Control & Rescue District
Training Manager, SW FL US&R TF-6**
