

Proper loading of Chep Pallets into Dispenser

When loading Chep pallets into the pallet dispenser, Make sure that the top of the flight is engaged into the pocket of the pallet. If it is not, The dispenser will not feed correctly and cause unwanted jams.

When loading a machine from empty, Drop a chep pallet on top of the screw. Using the manual controls, jog the machine in reverse until the pallet falls into the pocket of the pallet.

Now proceed to add more pallets until the cavity is filled.
