GRAPHICS	This is one area I want the most to make improvements, but I will wait for Godot 4 to come out. Godot 4 will bring lots of improvements in the graphics and performance area, so I'm holding part of my efforts and time for when it's available. There is no release date for Godot 4.					
AUDIO	Engine sounds needs lots of improvements yet.					
PRICE	FREE	I plan to increase the price for the game when it is more content and feature rich. But don't worry, it will be gradual, and I will inform everyone 1 month before the price increase. The final price for the game (version 1.0) will be something like 30-40 US\$.
