GRAPHICS	This is one area I want the most to make improvements, but I will wait for Godot 4 to come out. Godot 4 will bring lots of improvements in the graphics and performance area, so I'm holding my effort and time for when it's available. There is no release date for Godot 4, but I think it's safe to say it will come in 2021.					
AUDIO	The game has no sound right now... Yeah, I know, I'm guilty of this... How is that possible, a game with no sound! I'll do my best to implement sound before July 2021.					
PRICE	FREE	I plan to increase the price for the game when it is more content and feature rich. But don't worry, it will be gradual, and I will inform everyone 1 month before the price increase. The final price for the game (version 1.0) will be something like 30-40 US\$.
