## About us

---

Bemax Logistics, founded in April 2021 in Malaysia, is a player in the shipping industry. The Company provide comprehensive logistics solutions to businesses of all sizes, offering reliable, fast, and cost-efficient shipping services worldwide. With a wide range of shipping options, including air, sea, and ground shipping, customers can easily choose what suits them best. Additionally, Bemax Logistics goes beyond standard shipping, providing specialized services like express shipping, door-to-door delivery, and custom packaging. Their use of advanced technology and sophisticated tracking systems ensures timely and precise deliveries.

## Vision

---

We strive to be recognized as a trailblazer in the field, setting new standards for reliability, efficiency, and customer satisfaction. With a relentless commitment to excellence, we aim to build enduring partnerships, enabling businesses worldwide to thrive through seamless and cost-effective logistics. Our ultimate goal is to reshape the future of logistics and create a world where goods flow effortlessly, connecting people and markets across borders with unrivalled ease.

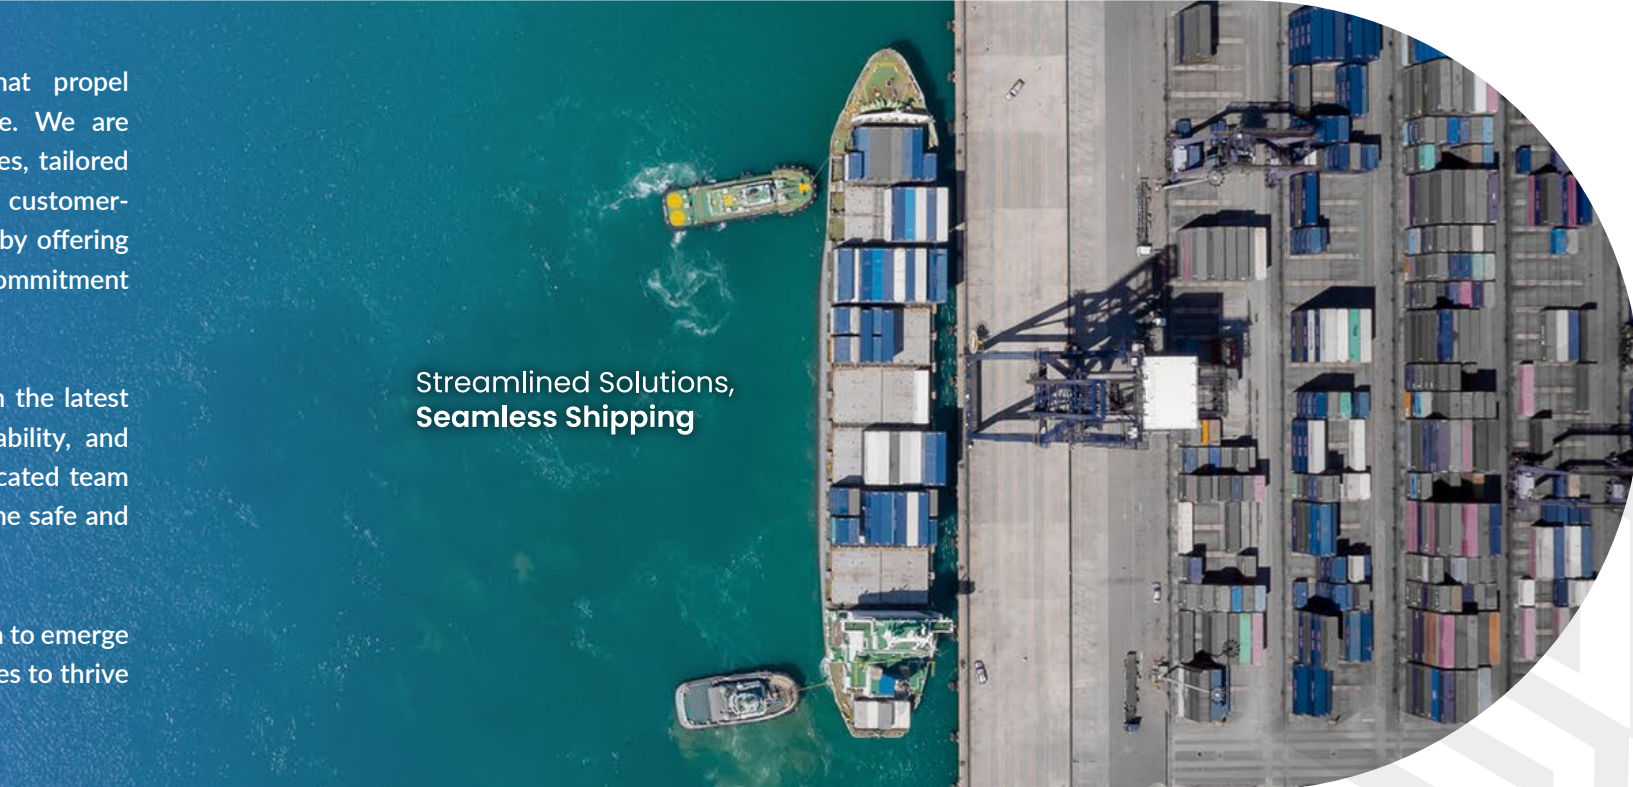

## Our Mission

---

Providing cutting-edge, end-to-end logistics solutions that propel businesses forward in an ever-evolving global marketplace. We are dedicated to delivering seamless and reliable shipping services, tailored to meet the unique needs of each customer. Through a customer-centric approach, we aim to foster long-lasting partnerships by offering personalized solutions, exceptional customer support, and a commitment to meeting deadlines with precision.

Driven by a passion for excellence, we continuously invest in the latest technology and best practices, ensuring efficiency, sustainability, and cost-effectiveness in all our operations. Our skilled and dedicated team of professionals work with integrity and diligence to ensure the safe and timely delivery of goods, no matter the size or complexity.

Through our unwavering dedication to superior service, we aim to emerge as a globally recognized logistics leader, empowering businesses to thrive in a seamless, connected world.

Seamless Shipping

# Freight Forwarder

Freight forwarding is the process of arranging the transportation of goods and products from one place to another. It involves the coordination of various activities, including transportation, customs clearance, and documentation, to ensure that goods are delivered to their final destination in a timely and efficient manner.

We act as intermediary between shippers and carriers, we are negotiating the best rates and terms for our customers and arranging for the transportation of goods by sea.

Bemax Logistics can be a cost-effective solution for companies that need to transport goods, as Bemax Logistics have the expertise and relationships with carriers to negotiate the best rates and terms. It also allows companies to focus on their core business activities, as the logistics of transporting goods are handled by Bemax Logistics.

Overall, Bemax Logistics is a key component of logistics and supply chain management, and Bemax Logistics play a critical role in ensuring that goods are transported efficiently and effectively from one place to another.

The services offered by Bemax Logistics can vary depending on the company, but typically include:

## Transportation arrangement

Coordinating the transportation of goods by sea based on the specific needs of the shipper.

## Documentation preparation

Preparing and processing the necessary documents, including bills of lading, customs declarations, and insurance certificates.

## Customs clearance

Assisting with the customs clearance process and ensuring that goods are cleared through customs in a timely and efficient manner.

## Insurance

Arranging for insurance coverage to protect the goods in transit.

## Tracking and monitoring

Tracking the shipment and monitoring its progress, and keeping the shipper informed of any issues or delays.

## Air Freight

Air freight, also known as air cargo or air transportation, refers to the transportation of goods, products, or cargo by aircraft. It is a method of shipping that involves using airplanes to move items from one location to another, both domestically and internationally.

Air freight is often chosen when speed is of the essence, and shipments need to be delivered quickly and efficiently. Compared to other modes of transportation, such as sea freight or ground transportation, air freight offers the advantage of rapid transit times, making it ideal for time-sensitive or perishable goods.

The rapid delivery choice

Bemax Logistics ensures the safe and efficient transportation of clients' goods by collaborating with airlines and other partners to guarantee timely and intact delivery to the intended destination. Additionally, the company offers supplementary services like cargo tracking, customs clearance, and insurance, providing a comprehensive solution for clients' air freight requirements.

# Custom Brokerage

Bemax Logistics can give full information about your goods before shipping them to and from Malaysia to ensure the best service without hindrance Customs clearance is the process of obtaining permission from the relevant authorities to bring goods across international borders.

The main objective of customs clearance is to ensure that all goods entering a country comply with the relevant regulations, including customs duties, taxes, and restrictions on the import or export of certain goods. Customs clearance can be a complex and time-consuming process, and it is important for importers to be aware of the relevant regulations and procedures to ensure smooth and efficient customs clearance.

The customs clearance process typically involves the following steps:

## Documentation

The customs authorities require a set of documents, such as the commercial invoice, bill of lading, and other trade-related documents, to clear the goods through customs.

## Payment of duties and taxes

The importer or the authorized agent pays the applicable duties and taxes to the customs authorities.

## Inspection

The customs authorities inspect the goods to verify their nature, quantity, and value, and to ensure that they comply with all applicable regulations.

## Release of goods

After the payment of duties and taxes, the customs authorities release the goods to the importer or the authorized agent, who can then take possession of the goods.

## Determination of duties and taxes

Based on the inspection, the customs authorities determine the applicable duties and taxes on the goods, which must be paid before the goods can be released.

# Haulage & Transportation

Our Services

Haulage involves moving goods using trucks or commercial vehicles between various locations, whether it's short distances locally or long distances across countries. Haulage companies specialize in transporting specific goods, like hazardous materials, oversized items, or temperature-sensitive products, often using specialized vehicles or equipment. It is a crucial part of supply chain management, ensuring efficient and effective goods movement from one place to another. There are several types of haulage services, including:

**Type 01** **Normal trailer**  
This involves moving containers of different sizes (20'GP single, 20'GP back to back, 40'GP/HQ).

**Type 02** **Side loader trailer**  
A specialized trailer equipped with hydraulic cranes or lifts on the sides, designed to load and unload heavy, bulky, or oversized items like containers, machinery, and construction equipment efficiently.

**Type 03** **Full truckload (FTL)**  
Transportation of a large quantity of goods in one truck, typically for a single customer.

**Type 04** **Less-than-truckload (LTL)**  
Transportation of smaller shipments from multiple customers in a single truck.

**Type 05** **Heavy haulage**  
Moving oversized or overweight items, such as construction equipment or machinery.

**Type 06** **Refrigerated haulage**  
Transporting perishable goods like food and pharmaceuticals at a controlled temperature.

**Type 07** **Flatbed haulage**  
Carrying goods on an open trailer without sides or roof, often for large or awkward items.

**Type 08** **Dry van haulage**  
Transporting non-perishable items in a standard enclosed trailer.

**Type 09** **Specialised haulage**  
Moving specific goods like hazardous materials or livestock, requiring specialized equipment and handling.

## Warehousing

### Our Services

Warehousing is the storage of goods and products in a facility designed for that purpose. It is a critical component of the logistics and supply chain management, providing a temporary storage location for goods between the point of origin and the point of consumption. A warehouse can be owned by a Bemax Logistics, rented from a third-party provider, or operated by a Bemax Logistics. Warehouses vary in size, from small facilities for local businesses to large, multi-level buildings for multinational corporations. The primary functions of a warehouse are to store, protect, and manage goods and products. Warehouses are equipped with various storage solutions, such as shelving, racks, and pallets, to maximize storage capacity and ensure the safe handling of goods.

Your Ultimate Warehouse Solution

In addition to storage, Bemax Logistics warehouse offer value-added services, such as order fulfillment, inventory management, packaging, and labeling. These services can help customers streamline their supply chain and reduce their operational costs. The choice of warehousing solution depends on several factors, including the type and volume of goods to be stored, the frequency of shipments, and the need for value-added services. Bemax Logistics always offer warehousing services as part of their overall logistics solutions, helping customers manage their supply chain from start to finish.
