

Introducing

M2MD

World-class software
SaaS platform

“An ideal back-end and device
complement for IoT solutions”

Reference designs and embedded
software for hardware devices

Advanced connection technology

Ultra-secure transport security
designed specifically for IoT

Your ideal partner
in edge sensors

Cutting edge hardware

Market and innovation leader

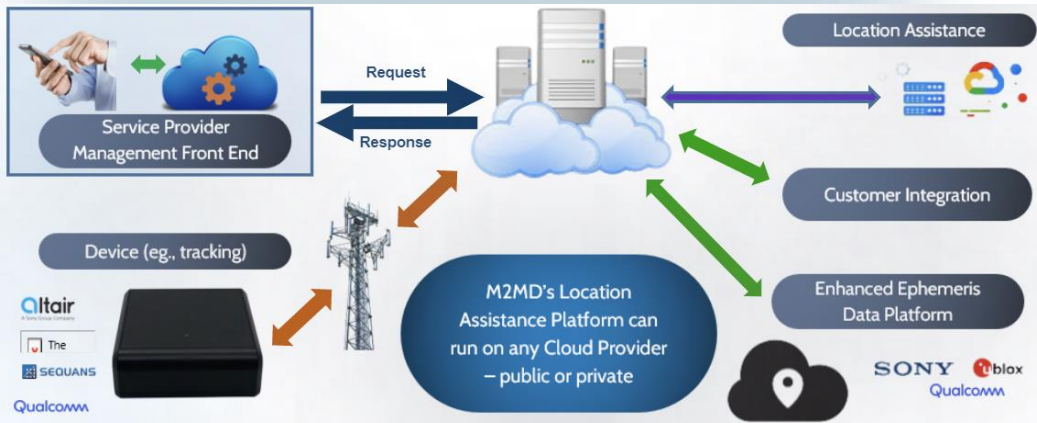

Extreme battery life

Flexible design & expansion options

Products: MIG, Waldo (remote Edge sensor
with location determination functions)
& enterprise trackers

State of the art & backed by over 17 patents

Who we are?

Atlanta-based engineering and services company that builds innovative, efficient & secure cellular-based technology for IoT & edge sensor devices.

Competitive Advantage

No wait to locate

Patented “On Demand”
device communications

Designed and Manufactured
in the USA

Modular approach
which reduces lead time

Up to 10 year life per battery

Optional utilization
of power-hungry
breadcrumb technology

M2MD patented next
generation wireless
IoT connection,
power management and
security technology.

Accurate location
regardless of environment

Less cellular data
+ no SMS messaging
= lower subscription cost
