# Ertel Cattle Co Bull Sale Information

## First Breeding Season Guarantee

Buyers of all bulls selling for \$3,000.00 or more that are injured the first breeding season, will have credit with Ertel Cattle Company at the value of the purchase price minus salvage value. Contact us promptly so the decision to return the bull to us or to sell the bull by the buyer may be made. Breeding season is defined as the 90 day period following the first turnout of the bulls. Any issues must be reported by October 1, 2022. Credits must be used on the purchase of 1 bull only. No warranty shall exceed the original purchase price of the bull. Buyers who choose to freeze semen on a bull prior to or during the first breeding season has the warranty fulfilled with the semen you froze.

## Health

All bulls selling have passed a complete breeding soundness exam and sell as guaranteed breeders. Health papers and semen evaluation papers are available on all bulls selling. Scrotal measurements will be available for all bulls selling on a supplement sheet sale day.

## Genomic Enhanced EPDs

The major benefits of GE EPDs are: risk reduction through improved accuracies, value of time to assess breeding stock at a younger age, increased rate of genetic progress, and getting data on economically important traits which are expensive or difficult to measure. All bulls have DNA submitted for GE EPDs. The bulls with GE EPDs in the sale book are denoted below the EPD box of the respective bull. All other bulls have GE EPDs pending and will be available on the supplement sheet sale day.

## Sale Book EPD Explanations

**Calving ease direct (CED):** Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

**Birth weight (BW):** Predicts the difference, in pounds, for birth weight of the calf. **Weaning weight (WW):** Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

**Yearling weight (YW):** Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

**Milk (Milk):** The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

**Total maternal (TM):** An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. As an index, this value is not reported with an accompanying accuracy. A greater TM value means a mother that returns comparatively higher weaning weights on her calves.  $TM \text{ Index} = MK \text{ EPD} + 1/2 \text{ WW EPD}$ .

**Calving ease maternal (CEM):** Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

**Yield grade (YG):** Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

**Carcass weight (CW):** Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint. **Ribeye area (REA):** Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

**Marbling (MB):** Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

**Feeder profit index (FPI):** An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on grade and yield. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

## Insurance

We highly recommend retaining insurance on your purchases. We and suggest and help you get insurance arranged following the sale. If your purchase goes back to Ertel Cattle Co following the sale, please retain insurance. When the bull sells he becomes responsibility of the buyer.

24295 Benton Road  
Kirkville, MO 63501

**Viewing of Sale Bulls**

Bulls may be viewed at Ertel Cattle Company until March 17, then will be available for viewing at Kirkville Livestock Market on March 18 & 19.

**Terms & Conditions**

Terms are cash or check, and settlement must be made sale day before any cattle leave the sale facility. All cattle sell under the standard terms and conditions as suggested by the American Gelbvieh Association. When bulls are sold they become the responsibility of the buyer.

**ShowMe Select Genetic Power Qualifying Bulls**

Many bulls that qualify for ShowMe Select are selling. The bulls that qualify are denoted just below the EPD box and in the footnote.

**Sale Offering Videos**

View videos of the sale offering online at [www.ertelcattle.com](http://www.ertelcattle.com), [www.mms.bz](http://www.mms.bz), and [www.dvauction.com](http://www.dvauction.com)

**Liability**

All persons attending the sale do so at their own risk. Ertel Cattle Company, Kirkville Livestock Market or the sale management assumes no liability for accidents, theft or damages occurring at the sale facility.

**EPDs**

All EPDs are current as February 25, 2022 and provided by the American Gelbvieh Association. EPDs are subject to change before the transfer of registration and/or the buyers receipt of the transferred registration papers due to updated data recorded at the AGA.

**Trucking**

Please contact Ginger Ertel or MMS to discuss trucking needs.

**Ertel Cattle Co Semen Interest**

Ertel cattle Company will retain 50% semen interest in all bulls selling.

This sale will be broadcast live on the internet.

# Ertel Cattle Co Spring Balancer Bulls

**ERTL 445J** Sells as lot 1

## Lot 1, ERTL 445J

Strong performance bull sired by our resident AI Sire, Civil War and out of a RITO 616 dam that has weaned 4 calves for us. We have retained the only maternal sister in our program. Lot 1 weaned with a ratio of 132 and had a yearling ratio of 116. This is one of our top performance bulls this year with a great maternal strength. He ranks in the top 1% for WW, YW, TM and FPI, top 3% Marbling and the top 25% milk. Add pounds to your calves at weaning with Mr CW Mahoyu.

## Lot 2, ERTL 119J

Performance, maternal and carcass combined in a bull that is a favorite here at the ranch. His dam, 972G is a first calf cow that weaned 119J with a ratio of 115 and he had a yearling ratio of 114. Over 800 on his weaning and over 1450 on his yearling. A very strong bull sired by Civil War. He ranks in the top 1% for YW, 2% for WW, CW and FPI, 3% for TM, 10% for RE and 15% for Marbling. A true combination bull recommended for use on cows that should breed performance and carcass at the highest levels.

**ERTL 119J** Sells as lot 2

# Ertel Cattle Co Spring Balancer Bulls

**JKGF CIVIL WAR E92 SIRE OF LOTS 1-11**

**CCRO CAROLINA COOL 2330Z DAM OF LOT 4**

**JKGF Civil War E92** - Civil War is a 50% Balancer AI sire that has been used widespread within the Gelbvieh and Balancer breeds. His sons and daughters are among the top young cattle we have in our program. Civil War ranks in the top 45% for CE, 5% performance, 15% marbling and 3% FPI. You will get high volume cattle with excellent thickness, performance, maternal values and carcass values with his offspring. The Civil War daughters are great in production as well. His sons selling as lots 1-11 are our featured sire group that we strongly believe will work for you as well as he has worked for us.

A direct daughter of our donor, Carolina Cool 2330Z. This cow is extremely consistent with production of both bulls and females. Lot 46 should make an outstanding production female. AI'd on 12-06-2021 to 44 Main Street. Ultrasound safe to AI and due 9-15-22 with a heifer calf. PE to ERTL H21 Mr Texplay F21, a son of TEX Playbook 5437.
