Kirksville, Missouri

100 Lots Sell

60 Gelbvieh and Balancer Bulls ||| 40 Gelbvieh and Balancer Bred and Open Heifers

Ertel Cattle Co Bull Sale Information

First Breeding Season Guarantee

Buyers of all bulls selling for \$4,000.00 or more that are injured the first breeding season, will have credit with Ertel Cattle Company at the value of the purchase price minus salvage value. Contact us promptly so the decision to return the bull to us or to sell the bull by the buyer may be made. Any bulls sustaining injury must have a licensed Veterinarian inspection at buyers expense. Breeding season is defined as the 90 day period following the first turnout of the bulls. Any issues must be reported by October 1, 2024. Credits must be used on the purchase of 1 bull only in the next Ertel Cattle Company Production Sale. No warranty shall exceed the original purchase price of the bull and no warranty can be used on a warranty bull. Multiple bull pasture breeding voids the first breeding season guarantee. Buyers who choose to freeze semen on a bull prior to or during the first breeding season has the warranty fulfilled with the semen you froze. This is not an insurance policy. We highly recomend you purchase insurance on the bulls you purchase. Your bull is an investment and should be treated as such. Overworked, under cared for, or mismanaged bulls can not be replaced.

In case of death during the first breeding season, a 25% credit will be given toward the purchase of another bull in the next Ertel Cattle Company Production Sale. Any claims must be made prior to October 1, 2024.

Health

All bulls selling have passed a complete breeding soundness exam and sell as guaranteed breeders. All bulls have been tested BVD negative. Health papers and semen evaluation papers are available on all bulls selling. Scrotal measurements are in the sale book below the bull weights.

Insurance

We highly recommend retaining insurance on your purchases. We suggest and can help you get insurance arranged following the sale. If your purchase goes back to Ertel Cattle Co following the sale, please retain insurance. When the bull sells he becomes responsibility of the buyer. Insurance will be available sale day. Insurance will be available sale day through Conover Auction Service, Jeanne Conover 515-491-1355.

Sight Unseen Purchase Guarantee

All bulls sell under a sight unseen purchase guarantee as long as you contact Ertel Cattle Co or Mitchell Marketing Services to get information on the bulls of your interest. Ertel Cattle Co or MMS must handle your purchases for sight unseen guarantee. Bulls sold on DVAuction are not covered by sight unseen purchase unless contact is made to MMS or Ertel Cattle Co to get information on the bulls of your interest.

Ertel Cattle Company Semen Interest

Ertel Cattle Company is retaining 50% semen interest in all bulls selling. Buyer purchases full possession and 50% semen interest.

Annual Production Sale

Saturday, March 16, 2024, 5:30 (CT)
Kirksville Livestock Market
Kirksville, Missouri

100 Lots Sell

60 Gelbvieh, Balancer and Angus Bulls
40 Registered Gelbvieh and Balancer Females
Fall Bred Heifers and Spring Open Heifers

Sale Day Phones

Ginger Ertel 660-234-2654
Bill Ertel 660-341-1997
Chris Mitchell 334-695-1371

Auctioneer

Jared Miller 515-608-0953

Sale Facility Location

Kirksville Livestock Market 660-665-9804
24295 Benton Road
Kirksville, MO 63501

Viewing of Sale Bulls

Bulls may be viewed at Ertel Cattle Company until March 14, then will be available for viewing at Kirksville Livestock Market on March 15 & 16.

Terms & Conditions

Terms are cash or check, and settlement must be made sale day before any cattle leave the sale facility. All cattle sell under the standard terms and conditions as suggested by the American Gelbvieh Association. When bulls are sold they become the responsibility of the buyer.

Show-Me-Select Qualifying Bulls

Many bulls that qualify for Show-Me-Select are selling. The bulls that qualify are denoted in the pedigree of each animal.

Sale Offering Videos

View videos of the sale offering online at www.ertelcattle.com, www.mms.bz, and www.dvauction.com

Liability

All persons attending the sale do so at their own risk. Ertel Cattle Company, Kirksville Livestock Market or the sale management assumes no liability for accidents, theft or damages occurring at the sale facility.

EPDs

All EPDs are current as February 18, 2024 and provided by the American Gelbvieh Association. EPDs are subject to change before the transfer of registration and/or the buyers receipt of the transferred registration papers due to updated data recorded at the AGA.

Trucking

Please contact Ginger Ertel or MMS to discuss trucking needs.

Ertel Cattle Co Semen Interest

Ertel cattle Company will retain 50% semen interest in all bulls selling.

This sale will be broadcast live on the internet.

Genomic Enhanced EPDs - GGP

The major benefits of GE EPDs are: risk reduction through improved accuracies, value of time to assess breeding stock at a younger age, increased rate of genetic progress, and getting data on economically important traits which are expensive or difficult to measure. All bulls have DNA submitted for GE EPDs. The bulls with GE EPDs in the sale book are denoted with the GGP logo in the pedigree of the respective bull. All other bulls have GE EPDs pending and will be available on the supplement sheet sale day.

Sale Book EPD Explanations

Calving ease direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf. **Weaning weight (WW):** Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

Milk (Milk): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Total maternal (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. As an index, this value is not reported with an accompanying accuracy. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. $TM\ Index = MK\ EPD + 1/2\ WW\ EPD$.

Stayability (ST): Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

Docility (DOC): Is reported as a percentage, with higher numbers indicating a higher percent of offspring receiving a disposition score of 1 (docile).

Calving ease maternal (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Feeder profit index (FPI): An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on grade and yield. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

\$Cow: Represents the genetic value in dollars of profit of an animal when retained as a replacement female relative to other animals in the herd. A higher number represents more profitable genetics for maternal productivity. \$Cow will serve producers in selecting bulls that will sire daughters with stayability and reproductive efficiency as well as other traits that lead to profitability in a production system, such as milk, calving ease, moderate mature weight and the ability of calves to gain. A female's genetics also influence the performance of her calves in the feedlot and at slaughter, so traits such as feed efficiency and carcass value are also included in \$Cow.

Efficiency profit index (EPI): An economic selection index developed to aid producers in selecting for more feed efficient cattle that still have acceptable amounts of gain. The EPI provides slight negative pressure on intake, while keeping gain at a constant value. By selecting on this index, producers will be able to find those animals that gain the same amount as their contemporaries while eating less.

Ertel Cattle Company Females Lots 61 - 100

All females selling are heifers we have planned to retain in our program after our extensive culling process. All females selling have Genomic Enhanced EPDs. Coat color tests and polled tests were done on most of the females selling. We breed for strong maternal traits of fertility, milk and brood cow qualities. Added values also focused with our breeding is low birth, high performance and high marbling. These females selling are true combination females with cow families that have stood the test of time in herd.

All Fall bred females have been pregnancy checked via ultrasound with most being AI bred with sex of the calf listed. All pregnancy status is listed in the footnote of the repective heifer.

Pasture Exposure dates for fall bred heifers.

PE 11/27/23 to 2/12/24 to LRSF Glacier K136. PE 12/11/23 to 2/12/24 to Panther Cr Optics.

Pasture Exposure Sires:

LRSF Glacier K136 (AMGV1538620) - Glacier K136 was our choice of JOB Pay Pal sons in the 2023 Larson's Lost River Livestock sale. He is a calving ease Pay Pal son with CE EPD of 16 and BW EPD of -1.6 to go with top 25% Marbling and FPI. Massive bull with excellent performance as well. His first progeny come this spring.

Panther Cr Optics (AAA 20285476) - Panther Cr Optics 2904 was the top selling bull in the 2023 Panther Creek Ranch production sale. He is a top 10% CE, 5% WW & YW, 20% Marblin, 20% \$B and 15% \$C. He is a high volume bull that packs quality with a strong EPD profile. We look forward to his progeny coming this spring.

AGA Dam of Merit and Dam of Distinction

Ertel Cattle Company ranks number 16 in the Breed for DOM and DOD.
 Ranks number 2 in the state of Missouri.

Every fall, the American Gelbvieh Association honors the females in the herdbook that exhibit consistent maternal efficiency through the Dam of Merit and Dam of Distinction program. The American Gelbvieh Association credits its members who continue to place selection emphasis on the maternal traits of the breed by being owners or breeders of these outstanding Gelbvieh and Balancer® females.
