Connecting Wallets to avoid fees

In this LP

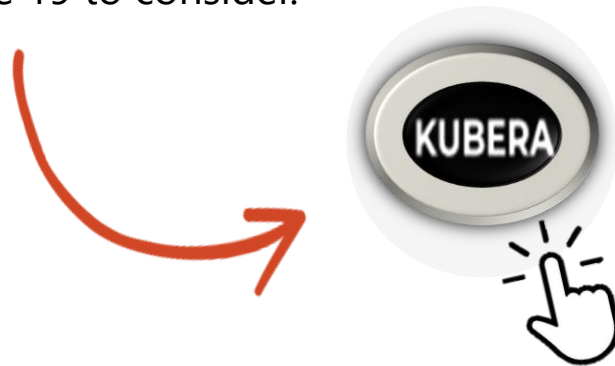

MetaMask,
Crypto.com,
Binance, Kubera

Tools to manage multiple wallet

KUBERA

1 Using **Multiple wallets** is currently common, but many are working diligently to remove this need.

2 Select the link and review the information that **teaches about cold and hot wallets** and their explanation of wallet diversification. NOTE: I have not reviewed this company or produce and **do NOT recommend** using it until I can complete a review. Educational purposes only. As well as the 19 to consider.

19 Best Crypto Portfolio Tracker Apps

3 After understanding one tools like KUBERA, here are **18 more with an easy table layout** to compare.

4 Short **step-by-step** in the Crypto.com wallet. A great tools I do use.

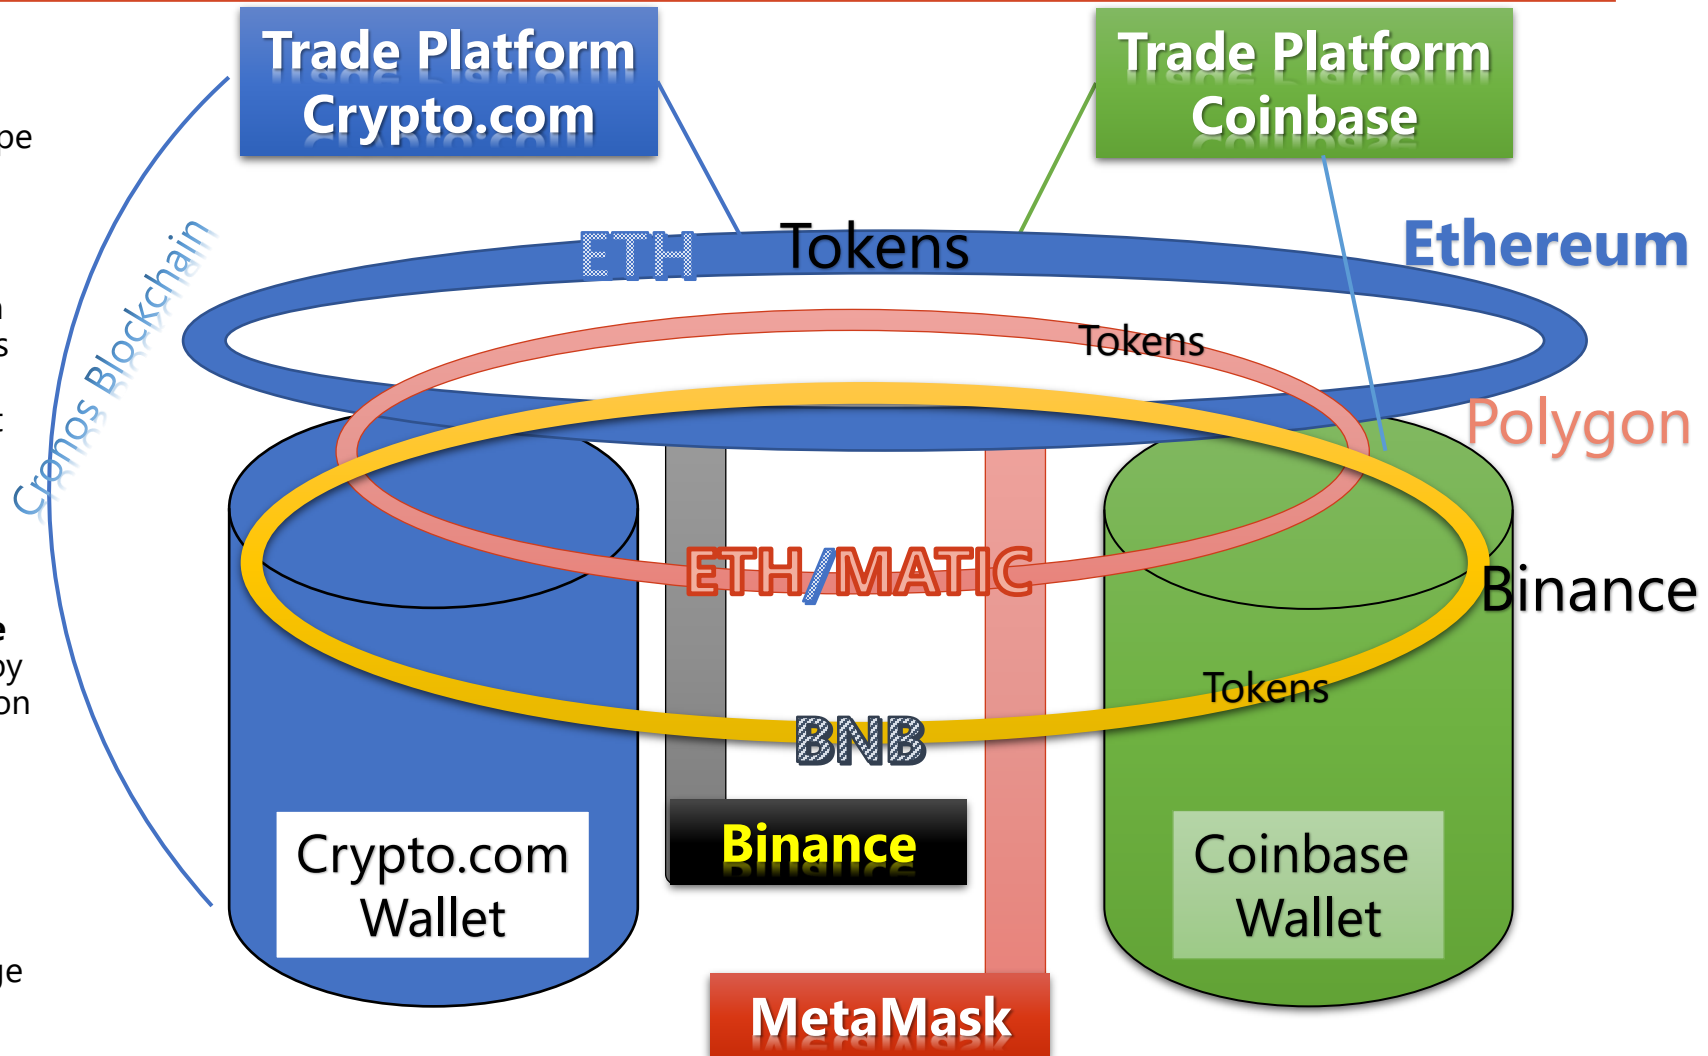

How to Create, Import, and Connect Multiple Wallets?

Blockchain connection

- 1 I am sure the **illustration** on the right look nuts, but before we are done, I hope it makes some senses. **Shows connecting Blockchains.**
- 2 The Rings are here **Ethereum, Polygon and Binance**, 3 of the main blockchains used and they intersect on swap platforms and within trading and wallet design. **Fees are the main** theme here we are addressing in this lesson.
- 3 The **prior information** in this lesson talked about how to **navigate multiple wallets**. This is the reason many employ this activity, to avoid fees and transaction cost.

Coming Soon: After completing this lesson plan you can test your knowledge and earn EDU.Crystals

Compare the best transaction and fees costs.

- 1 The link on "**Best Crypto Exchanges Of 2022**" gives a very comprehensive review of the fees, APR and more.
 - 2 My personal experience does verify most of the data found on the link. Besides this information regarding fees in wallets etc. it is **also good to know** that Ethereum cost gas and there is a **meter you can read to know the cost.**
 - 3 Binance is **extremely low in transaction fees** compared to Ethereum so the following page will illustrate how I have my wallets connected to receive passive income with minimal fees.
- Coming Soon:** After completing this lesson plan you can test your knowledge and earn EDU.Crystals

The Best Crypto Exchanges Of 2022

My Wallet Sequence

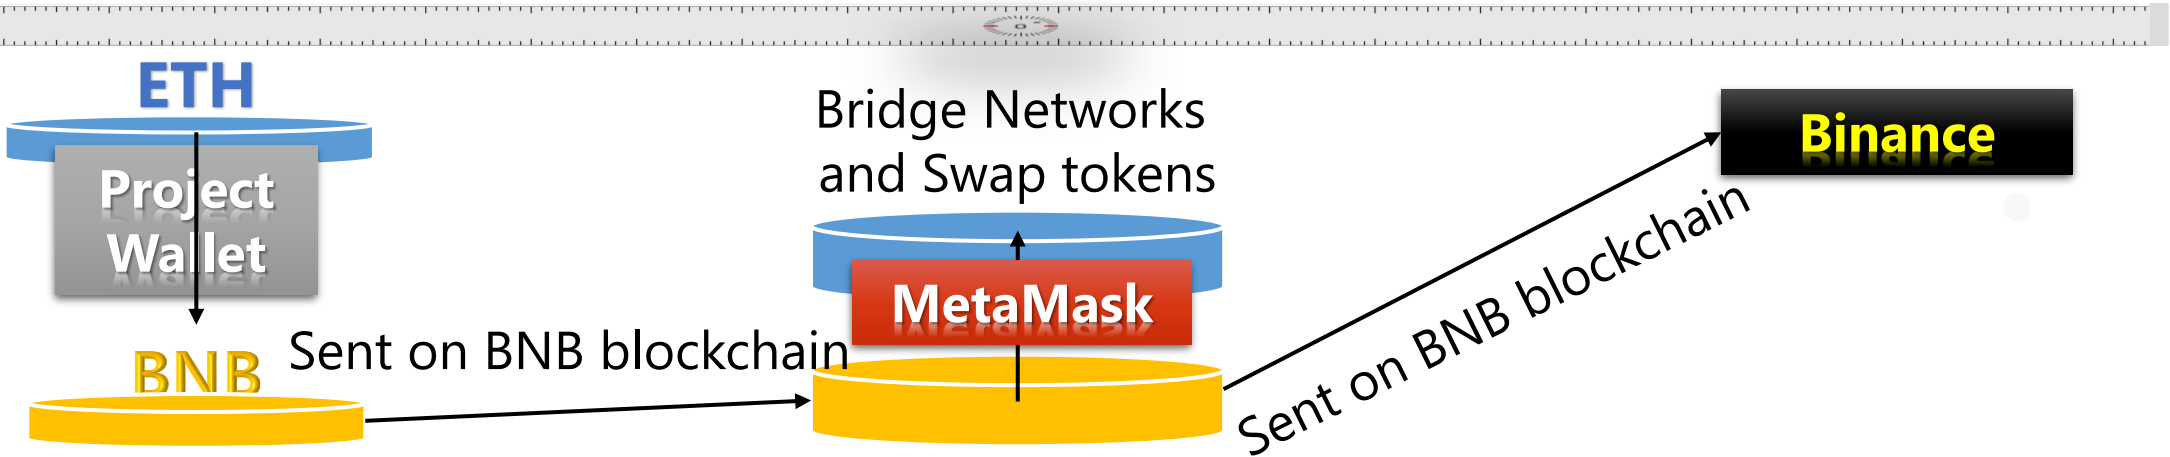

1 The NFT I own sends monthly income generated in ETH, converted to BNB

2 Transferred BNB can be bridge back to ETH to buy more NFTs or Other tokens

3 I transfer my passive income into BNB to my Binance Wallet and trading it there.

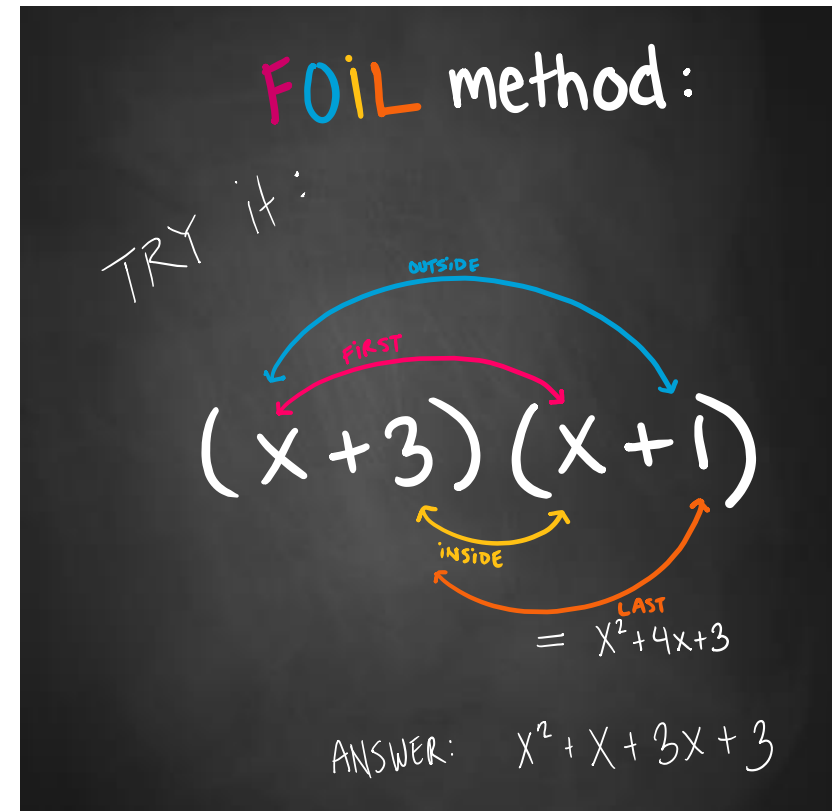

Okay, confusing but NOT Algebra FOIL, lol. Something you will use.

Inclosing note this information is changing monthly as new technology is evolving.

Many of the information I **have gained is firsthand** from trying it myself and comparing the fess on numerous attempts with recording this information.

I still find Coinbase more expensive of the ones that I still use and find Crypto.com wallet and TP, Coinbase Wallet and TP, **MetaMask with 7 internal wallets**, Binance wallet are all active. Kucoin, Phantom, Gemini, Nexo and Kraken are installed but, Kucoin is the only one with an account. I don't plan on getting any more unless thy do consolidate my current wallets as the Apps I discussed at the beginning.

Thank you, please contact me if you have questions?
