

Bibliography for Creationist and Modern Cosmology

BIBLIOGRAPHY

These references are all sources that I have read in-part or in full. Some are quite good from a “scientific” point of view or a creationist point of view. Other scientific articles or books are too in-depth mathematically technical to be of much use, but often have a useful abstract, introduction, or summary which may shed a ray of light on the assumptions, interpretations, and biases of the ideas, models, or conclusions of the authors. Creationist references are annotated by an asterisk (*)

BOOKS:

- Carmeli, M., *Cosmological Special Relativity: The Large-Scale Structure of Space, Time and Velocity*, Second Edition, Singapore, World Scientific, 2002.
- Chaisson, Eric and McMillan, Steve, *Astronomy Today*, 3rd Edition [now in 9th], Prentice Hall, Upper Saddle River, NJ, 1999, pp. 661. A standard introductory college astronomy textbook.
- Dodelson, Scott and Schmidt, Fabian, *Modern Cosmology*, 2nd Edition, Academic Press, Cambridge, MA, 2021, preview at https://www.amazon.com/Modern-Cosmology-Scott-Dodelson-ebook/dp/B087JNKW63/ref=sr_1_3_sspa?dchild=1&keywords=Cosmology&qid=1616199132&sr=8-3-spons&psc=1&spLa=ZW5jenlwdGVkUXVhbGlmaWVyPUE1UVJRMVg1MUFQRDAmZW5jenlwdGVkSWQ9QTAwMTMwMjVVCVldLNzHOE4zQU8mZW5jenlwdGVkQWRJZD1BMDQ4MzM3MzNWM09BODZBTkhlLUUomd2lkZ2V0TmFtZT1zcF9hdGYmYWwN0aW9uPWNSaWNRUmVkaXJlY3QmZG9Ob3RMb2dDbGJjaz10cnVl. Graduate School level introduction to modern cosmology in all its mathematical glory. It is easier to follow than Pathak’s Lecture Notes below under **Courses**.
- *Faulkner, Danny R., *The Created Cosmos*, Master Books, Green Forest, AK, 2016, pp. 352.
- *Faulkner, Danny R., *The Expanse of Heaven*, Master Books, Green Forest, AK, 2016, pp. 352.
- *Fr. Seraphim Rose, *Genesis Creation, and Early Man: The Orthodox Christian Vision*, St. Herman of Alaska Brotherhood, Platina, CA, 2011, pp. 1143. A must have for the Orthodox Christian interested in Biblical creation. Currently out of print.
- Greene, Brian, *The Fabric of the Universe: Space, Time and the Texture of Reality*, Vintage Books, New York, NY, 2004, pp. 569. Physics for the general public.
- Greene, Brian, *The Elegant Universe: Superstrings, Hidden Dimensions, and the Quest for the Ultimate Theory*, W. W. Norton & Company, New York, NY, 2003, pp. 448. More physics and string theory for the general public.
- *Hartnett, John, Dr., *Starlight, Time, and the New Physics: How we can see starlight in our young universe (Updated, Second Edition)*, Creation Book Publishers, Atlanta, GA, 2010, pp. 220. Outdated scientifically now.
- *Humphreys, D. Russell, *Starlight & Time: Solving the Puzzle of Distant Starlight in a Young Universe*, Master Books, Green forest, AK, 1994, pp.137. Outdated scientifically now.
- Hubble, E.P., *The Observational Approach to Cosmology*, Clarendon Press, Oxford, UK, 1937, pp. 50-59. <http://ned.ipac.caltech.edu/level5/Sept04/Hubble/paper.pdf>
- *Lisle, Jason P., *Taking Back Astronomy*, Master Books, Green Forest, AK, 2006, pp. 126. A wonderful introduction to astronomy from a creationist viewpoint.
- *Lisle, Jason, *The Physics of Einstein: Black Holes, Time Travel, Distant Starlight, E=mc²*, Biblical Science Institute, Aledo, TX, 2018, pp. 282. An extremely well written and easy to follow introduction to Special Relativity and other topics.

*Meyer, Stephen C., *Return of the God Hypothesis: Three Scientific Discoveries That Reveal the Mind Behind the Universe*, Harper One, New York, NY, 2021, pp. 568. Hot off the press -- a wonderful look at the philosophical biases in cosmology and biology from a leader in the belief of intelligent design.

Mukhanov, Viatcheslav, *Physical Foundations of Cosmology*, Cambridge University Press, Cambridge, U.K., 2005, pp. 421, https://www.academia.edu/24036668/Physical_Foundation_of_Cosmology?email_work_card=view-paper

Ta-Pei Cheng, *Relativity, Gravitation, and Cosmology: A basic introduction*, Oxford University Press, Oxford, , 2005, pp. 355.

*Williams, Alex and Harnett, John, *Dismantling the Big Bang: God’s Universe Rediscovered*, Master Books, Green Forest, AK, 2005, pp. 346. A good introduction to problems with the big bang theory. It’s cosmology is now out of date.

Courses/Lectures:

Pathak, Shankar, D., *What is Cosmology? Physical Theories and Observations*, (Lecture), Lucknow University Lucknow, India, (2012). This is a very simple slide presentation (without audio), a simple introduction to cosmology. https://www.academia.edu/2058248/What_is_Cosmology

Pathak, S.D., *Physics 652: Astrophysics: Lecture Notes*, Department of Physics, Lucknow University Lucknow, India, (2012), pp. 163, https://www.academia.edu/2573548/Useful_Notes_for_all. These notes cover all aspects of Astrophysics at a Graduate School level in physics and mathematics. They cover a wide spectrum of topics in astrophysics, but are very mathematically intensive.

Peiris, Hiranya V., *Cosmology Part I: The Unperturbed Universe*, Institute of Astronomy, University of Cambridge, Cambridge, U.K., pp. 1-54, <https://www.academia.edu/25729571/>

Peiris, Hiranya V., *Cosmology Part I: The Homogeneous Universe*, Institute of Astronomy, University College London, London, U.K., pp. 1-54, <https://www.academia.edu/25729571/>

Peiris, Hiranya V., *Cosmology Part II: The Perturbed Universe*, Institute of Astronomy, University College London, London, U.K., pp. 1-25, <https://astrophysics-notes-xparts.weebly.com/uploads/1/3/7/5/137502968/cosmology2.pdf>

VIDEOS:

*Russel Humphreys, *Cosmology: The First Four Days*, (2019, Lecture), July 19, <https://www.youtube.com/watch?v=e9YcMirw4K8>

Peiris, Hiranya V., *The Universe, A Detective Story: Hiranya Peiris at TEDxCERN*, (2013), <https://www.youtube.com/watch?v=oCaR1uE3OV8>

PH.D. THESES:

Arroja, Frederico M. A., *On the Four-Dimensional Effective Theories in Brane-Worlds*, (Ph.D. Thesis), Institute of Cosmology and Gravitation, University of Portsmouth, United Kingdom, 2015, pp. 176, https://www.academia.edu/220149/On_the_four_dimensional_effective_theories_in_brane_worlds?email_work_card=view-paper

Choudhury, Sayantan, *Field Theoretic Approaches To Early Universe*, (Ph.D. Thesis in Theoretical Physics), University of Calcutta, India December, 2014, pp. 156. https://www.academia.edu/23257000/Field_Theoretic_Approaches_To_Early_Universe

Bibliography for Creationist and Modern Cosmology

- Ribeiro, Raquel H., *Aspects of Inflation and the Very Early Universe*, (Ph.D. Thesis), Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Cambridge, U.K., 2013, pp. 271. https://www.academia.edu/22654302/Aspects_of_inflation_and_the_very_early_universe?email_work_card=view-paper. Includes a good introduction to inflation.
- Mattsson, Teppo, *Acceleration of the Cosmological Expansion as an Effect of Inhomogeneities*, (Ph.D. Thesis), Helsinki Institute of Physics, University of Helsinki, Helsinki, Finland, 2009, pp. 67. 1) https://www.academia.edu/10970584/Acceleration_of_the_Cosmological_Expansion_as_an_Effect_of_Inhomogeneities_Ph_D_Dissertation. 2) <https://helda.helsinki.fi/bitstream/handle/10138/23160/accelera.pdf%3Bjsessionid%3D1F88A23658646D5CB4E7DB6BBC385AAC?sequence%3D1>
- Trilleras, Alejandro Guarnizo, *A Model-Independent Approach to Dark Energy Cosmologies: Current and Future Constraints*, (Ph.D Thesis), Ruprecht-Karls-Universität Heidelberg, Fakultät für Physik and Astronomie Institute für Theoretische Physik, 2015, pp. 135. https://www.academia.edu/24855258/A_Model_Independent_Approach_to_Dark_Energy_Cosmologies_Current_and_Future_Constraints

- Carmeli, Moshe, *Cosmological Theories of Special and General*

Bibliography for Creationist and Modern Cosmology

- Relativity II*, invited talk given at the International Conference “*Frontiers of Fundamental Physics*” 6, held in Udine, Italy, September 26 - 29, 2004. https://www.researchgate.net/publication/226957933_Cosmological_theories_of_special_and_general_relativity_-_II
- Carmeli, M., Hartnett, J.G. and Oliveira, F.J., *The cosmic time in terms of the redshift*, [arXiv:gr-qc/0506079], *Found. Phys. Lett.* 19(3):277–283, 2006.
- Carroll, Sean M., *The Cosmological Constant*, *Living Reviews in Relativity*, (2001) 3:1-56, <http://www.livingreviews.org/lrr-2001-1>
- Cervantes-Cota, Jorge L., and Smoot, George, *Cosmology Today--A Brief Review*, https://www.academia.edu/36123343/Cosmology_today_A_brief_review?email_work_card=view-paper. This is an excellent introduction to Cosmology at a Graduate School level in physics and mathematics.
- CORE Collaboration, European Space Agency, *Exploring Cosmic Origins with CORE: Survey Requirements and Mission Design*, (2017), https://www.academia.edu/37084644/1706_04516_pdf?auto=download&email_work_card=download-paper. Good review of the intent of the CORE mission.
- CORE Collaboration, European Space Agency, *Exploring Cosmic Origins with CORE: Cosmological Parameters*, *Journal of Cosmology and Astroparticle Physics*, (2018), Vol. 2018, April, https://www.academia.edu/37084647/1612_00021_pdf?email_work_card=view-paper. Highly technical results from the collaborative group at the European Space Agency based on very recent intensive Cosmic Microwave Background Radiation (CMBR) and measurements of many parameters, used to support the currently favored Λ CDM Concordance Model of cosmology and “opening the window to new physics in the dark sector.”
- Costache, Doru, *At the Crossroads of Contemporary Cosmology and the Patristic Worldview: Movement, Rationality and Purpose in Father Dumitru Stăniloae, St. Teol*, Vol. 2, (2013), 141-164. https://www.academia.edu/6178277/At_the_Crossroads_of_Contemporary_Cosmology_and_the_Patristic_Worldview_Movement_Rationality_and_Purpose_in_Father_Dumitru_Stăniloae?email_work_card=view-paper. This is much more a philosophical work and not an analysis of modern science.
- Costache, Doru, *The Orthodox Doctrine of Creation in the Age of Science*, *Journal of Orthodox Christian Studies*, (2019), 2.1:43-64, Johns Hopkins University, <https://www.academia.edu/37088958>. Not particularly useful.
- Del Popolo, Antonio, *Dark Matter, Density Perturbations, and Structure Formation*, *Astronomy Reports*, (2007), 51(2):169-196, pdf at https://www.academia.edu/5262655/Dark_Matter_Density_Perturbations_and_Structure_Formation?email_work_card=view-paper. This is a nice introduction to dark matter and its theoretical role in the formation of large and small structures in the universe.
- *Dennis, Phillip W., *Consistent Young Earth Relativistic Cosmology, Proceedings of the Eighth International Conference on Creationism*, ed. J. H., Whitmore, Pittsburgh, PA, Creation Science Fellowship, (2018), 8:14-35, https://digitalcommons.cedarville.edu/cgi/viewcontent.cgi?article=1043&context=icc_proceedings. A relatively newly revived approach in cosmology using an anisotropic cosmology model -- a preliminary report.
- *Dennis, Phillip W., *Critical Analysis of Humphreys' Shell Metric Cosmology*, *Journal of Creation*, (2020), 34(2): 124-132, https://dl0.creation.com/articles/p137/c13758/j34-2_124-132.pdf. This is a good critique of Humphreys' model as being inadequate and based on flawed mathematics.
- *Dennis, Phillip W., *Remarks on Singular Hypersurfaces and Thin Shells in General Relativity*, *Foundations of Relativistic Physics*, (2020), July, pdf at <https://www.researchgate.net/publication/342611036>.
- Dunkley J, Komatsu E, Nolte MR, et al., *Five-Year Wilkinson Microwave Anisotropy Probe (WMAP) Observations: Likelihoods and Parameters from the WMAP Data*, *Astrophysical Journal Supplement Series*, (2008), pdf at <https://www.academia.edu/20079828/>. WMAP is the result of a partnership between Princeton University and NASA's Goddard Space Flight Center. This paper is an analysis of the WMAP Data and its interpretation. It shows that the Λ CDM model, described by just 6 parameters, is still an excellent fit to the WMAP data.
- Durrer, Ruth, *The Cosmic Microwave Background: The history of its experimental investigation and its significance for cosmology*, 2015, pdf only, <https://arxiv.org/pdf/1506.01907.pdf>
- European Space Agency, *From an Almost Perfect Universe to the Best of Both Worlds*, 2018, July 17, <https://sci.esa.int/web/planck/-/60499-from-an-almost-perfect-universe-to-the-best-of-both-worlds>
- *Faulkner, Danny R. 2013. *A proposal for a new solution to the light travel time problem*, *Answers Research Journal*, (2013), 6:279–284. <https://answersingenesis.org/astronomy/starlight/a-proposal-for-a-new-solution-to-the-light-travel-time-problem/>
- *Faulkner, Danny R. 2014. *Response to: "Critique: Faulkner's Miraculous Translation of Light Model Would Leave Evidence*, *Answers Research Journal*, (2014), 7:461-462. https://assets.answersingenesis.org/doc/articles/pdf-versions/arj/v7/Faulkner_light_model.pdf
- *Faulkner, Danny R., *The Case for Dark Matter*, *Answers Research Journal*, (2017), 10:89-101. <https://assets.answersingenesis.org/doc/articles/arj/v10/the-case-for-dark-matter.pdf>
- *Faulkner, Danny R., *The Case for Cosmological Redshifts*, *Answers Research Journal*, (2018), 11:31-47. https://assets.answersingenesis.org/doc/articles/pdf-versions/arj/v11/cosmological_redshifts.pdf. Important.
- *Faulkner, Danny R., *A Test for Quasar Cosmological Redshifts*, *Answers Research Journal*, (2018), 11:49-56. https://assets.answersingenesis.org/doc/articles/pdf-versions/arj/v11/test_quasar_cosmological_redshifts.pdf
- *Faulkner, Danny R., *The Current State of Creation Astronomy*, in J.H. Whitmore, ed., *The Proceeding of the International Conference on Creationism*, (2018), Creation Science Fellowship, Pittsburgh, PA; pp. 36–45. https://digitalcommons.cedarville.edu/icc_proceedings/vol4/iss1/21/
- *Faulkner, Danny R., *An Evaluation of Astronomical Young-Age Determination Methods I: The Solar System*, *Answers Research Journal*, (2018.) 11:31-47. <https://answersingenesis.org/astronomy/age-of-the-universe/an-evaluation-of-astronomical-young-age-determination-methods-i-solar-system/>. Important.
- *Faulkner, Danny R., *The Axis of Evil and the Cold Spot --Serious Problems for the Big Bang*, *Answers Research Journal*, (2019.) October 20. <https://answersingenesis.org/big-bang/axis-evil-cold-spot-serious-problems-big-bang/>

- *Faulkner, Danny R., *#4 Faint Sun Paradox*, *Answers Research Journal*, (2021), Jun 27, <https://answersingenesis.org/astronomy/sun/4-faint-sun-paradox/>
- *Faulkner, Danny R., *Solving the Light Travel Time Problem*, *Answers Research Journal*, (2021), February 23, <https://answersingenesis.org/astronomy/starlight/solving-light-travel-time-problem/>
- Freedman, Wendy L., *Measurements of the Hubble Constant: Tensions in Perspective*, *Astrophysical Journal*, (2021), July 1, pp. 49, <https://arxiv.org/abs/2106.15656>, pdf at <https://arxiv.org/pdf/2106.15656.pdf>. A top non-creationist contemporary astrophysicist researcher assessing current data on the Hubble Constant using the Λ CDM model vs. Planck observational data of Reiss.
- Gaia Collaboration, *Gaia Early Data Release 3: Summary of the contents and survey properties*, *Astronomy & Astrophysics*, 2021, Vol. 649, May 2021, <https://ui.adsabs.harvard.edu/abs/2021A%26A...649A...1G/abstract>
- Garcia-Bellido, Juan, *Astrophysics and Cosmology*, <https://www.researchgate.net/publication/1995272> [Review of Big-Bang Theory]
- Garcia-Bellido, Juan, and Haugølle, Troels, *Confronting Lemaitre-Tolman-Bondi Models with Observational Cosmology*, *Journal of Cosmology and Astroparticle Physics*, (2008), 2008:4, pp. 1-28, <http://arxiv-export-lb.library.cornell.edu/pdf/0802.1523>. A very nice introduction to the basic physics underlying Phillip W. Dennis' anisotropic creationist model. More importantly, the authors challenge the underlying fundamental theoretical principles on which most of modern cosmology is based. The introduction is reasonably easy to read, and a good overview of some of the problems in the modern theories of cosmology.
- Garcia-Bellido, Juan, and Haugbølle, Troels, *The Radial BAO Scale and Cosmic Shear, a New Observable for Inhomogeneous Cosmologies*, *Journal of Cosmology and Astroparticle Physics*, (2009), 2009(9), pp. 1-18, https://www.researchgate.net/publication/2214217_The_radial_BAO_scale_and_Cosmic_Shear_a_new_observable_for_inhomogeneous_cosmologies
- Gaztañaga, Cabré, Anna, and Lam Hui, *Clustering of Luminous Red Galaxies IV: Baryon Acoustic Peak in the Line-of-Sight Direction and a Direct Measurement of $H(z)$* , *Monthly Notices of the Royal Astronomical Society*, (2009), 399(3): 1663-1680, <https://academic.oup.com/mnras/article/399/3/1663/1077027>
- Goswami, G.K., Pradhan, Anirudh, and Beesham, A., *A Dark Energy Quintessence Model of the Universe*, *Modern Physics Letters A*, (2020), 35(4), February, <https://arxiv.org/pdf/1905.10801.pdf>. They present a two-fluid (baryonic and dark energy) FLRW model.
- Gray, R., and Dunning-Davies, J., *A Review of Redshift and Its Interpretation in Cosmology and Astrophysics*, (2008), PDF only, <https://arxiv.org/vc/arxiv/papers/0806/0806.4085v1.pdf>
- Greene, Brian, *How the Higgs Boson Was Found*, *Smithsonian Magazine*, (2013) (7) <https://www.smithsonianmag.com/science-nature/how-the-higgs-boson-was-found-4723520/>. Interesting popular astronomy literature.
- Halvorson, Hans and Kragh, Helge, *Cosmology and Theology*, *The Stanford Encyclopedia of Philosophy (Spring 2019 Edition)*, Edward N. Zalta (ed.), <https://plato.stanford.edu/entries/cosmology-theology/>
- Haridasu, Balakrishna S., Lukovic, Vladimir V., Vittorio, Nicola, *Isotropic vs. Anisotropic Components of BAO Data: A Tool for Model Selection*, *Journal of Cosmology and Astroparticle Physics*, (2018), 2018(5), pp. 1-21, pdf at https://www.academia.edu/37084655/1711_03929_pdf?email_work_card=view-paper
- Haridasu, Balakrishna S. and Vittorio, Nicola, *Cosmological Constraints from Low-Redshift Data*, *Foundations in Physics*, (2018), 48(2), October, pdf only, pp. 1-18, <https://www.researchgate.net/publication/322568426>. This is an excellent paper for graduate students in cosmology and others. The text can be followed relatively easy despite the advanced mathematics.

- Lukovic, Vladimir V., Haridasu, Balakrishna S., and Vitorio, Nicola, *Cosmological Constraints from Low-Redshift Data*, **Foundations of Physics**, (2018), 48(2), pdf, pp. 1-23, https://www.researchgate.net/publication/322568426_Cosmological_Constraints_from_Low-Redshift_Data/link/5dfc868c299bf10bc3694715/download. This is the best summary of contemporary cosmology, both of models, research techniques, and problems -- discussing both the standard concordance model symmetries versus many others including the inhomogeneous isotropic Lemaitre-Tolman-Bondi metric based models, which didn't fare as well as the Λ CDM models. Although highly mathematical, the text is quite understandable and lucidly written in a most historical and logical manner. Comparing and contrasting the various models and relating them to the newest research techniques in a very intelligent way, makes this a wonderful article to start with for those whose mathematical and physics skills are undergraduate

- Ratcliffe, Hilton, Alternative Cosmology Group, *Second Crisis in Cosmology Conference (CCC2)*, (2009), Port Angeles, WA, Sep 8--11, 2009, pp. 39. https://www.academia.edu/22478520/The_Second_Crisis_in_Cosmology_Conference_CCC2?auto=download&email_work_card=download-paper. This is an interesting collections of abstracts and summaries of multiple presentations on the state of Cosmology as assessed by them in 2009, i.e., seen through the eyes of non-mainstream non-Christian/Biblical alternatives cosmologists. It is now a bit dated but does deliver the message that lively debate improves science and prevents elitist tyranny by the Old Boys' Club of mainstream funded cosmologists. It covers much of the same type of information covered in my cosmology series of articles.
- Reichenbach, Hans, *Axiomatik der relativistischen Raum-Zeit-Lehre*, 1924, [English translation: Reichenbach, Maria, *Axiomatization of the Theory of Relativity*, University of California Press, Berkeley and Los Angeles CA, 1969, pp. 208.]. This is the source for Reichenbach's quotation referred to by Dr. John Gideon Hartnett in footnote 11 of *The Good Word*, Vol IX, Issue 6 Jul-Aug 2022, Part IIIc; *Alternative Models of Cosmology: ASC*
- Reid, David D., Kittell, Daniel W., Arsznov, Eric E., Thompson, Gregory B., *The Picture of our Universe: A View from Modern Cosmology*, (2002), pp. 1-33. https://www.academia.edu/34310612/The_picture_of_our_universe_A_view_from_modern_cosmology?auto=download&email_work_card=download-paper. This is one of the best introductions to many of the concepts of modern cosmology for graduate students in physics or astronomy. It also gives a very clear picture of where different assumptions are introduced into modern cosmology models, and how these various models are built on these assumptions. Whether or not these assumptions correspond to reality is a big question, and perhaps more philosophically based than reality based. How close they may approximate reality is questionable. The models and the math are constructed to be solvable metrics of Einstein's field equations -- but are much simplified relative to reality, so as to be solvable. This is still a very mathematically technical article, but the text is so clear and logically written, much can be gained in spite of the math.

This article is a rebuttal to young earth creationism by a non-scientist. It shows how a lack of scientific training and critical thinking can fall prey to science, *falsely so called*.
- Saadeh, Daniela, Feeney, Stephen M., Pontzen Andrew, Peiris, Hiranya V., and McEwen, Jason D., *How Isotropic is the Universe?*, *Physical Review Letters*, (2016), 117.131302, Sep 23 pp. 5, <https://discovery.ucl.ac.uk/id/eprint/1493640/1>. This paper looks at the isotropy of the universe in a homogeneous universe, the Bianchi metric, for Einstein's equations. In all Bianchi types, anisotropy is quantified in terms of the shear tensor $\sigma_{\mu\nu}$, which describes the deformation that the fluid element in the Universe undergoes as a result of anisotropic expansion. They used the Planck CMB polarization data as the ideal probe to constrain all but the regular tensor modes. They found overwhelming evidence against deviations from isotropy. Creationist models are generally finite, geocentric, isotropic but non-homogeneous, so do not fit into this type of Bianchi characterization. So it is an important article for creationists and mainstream cosmologists not to pursue this model type.

- Weinberg, David H, Mortonson, Michael J., Eisenstein Daniel J, Hirata, Christopher, Riess, Adam G., Rozo, Eduardo, *Observational Probes of Cosmic Acceleration*, 2013, pp. 289, pdf only, https://www.academia.edu/21838057/Observational_probes_of_cosmic_acceleration?email_work_card=title. This is an excellent balanced review of cosmic acceleration (Hubble expansion of the Universe) as viewed by mainstream astronomy, and review the four most established methods for measuring that expansion: Type Ia supernovae, baryon acoustic oscillations, weak gravitational lensing, and the abundance of galaxy clusters. They review other approaches as well. This paper is quite detailed and well written, but is also quite mathematical and uses very technical language and concepts. It is for graduate school level astronomy students and researchers, but gives a good sense of the state of the art of precision cosmology and the problems of theory as well as with observational techniques.
- Wolchover, Natalie, *Astronomers Get Their Wish, and a Cosmic Crisis Gets Worse*, *Quantamagazine*, Dec 17, 2020, pp. 3, at <https://www.quantamagazine.org/astronomers-get-their-wish-and-the-hubble-crisis-gets-worse-20201217/>
- Wolchover, Natalie, *The Webb Space Telescope Will Rewrite Cosmic History. If It Works*, *Quantamagazine*, Dec 3, 2021, <https://www.quantamagazine.org/why-nasas-james-webb-space-telescope-matters-so-much-20211203/>. This is a wonderful look at observational astronomy over the past 40 years or so, focusing on the Hubble Space Telescope, the Kepler Telescope, and the Webb Space Telescope to be launched December 22, 2021, and examine the deeper regions of space from orbit at the Lagrange point 2 (4 times more distant from earth than the moon) and shielded from behind from all heat. The Webb telescope will use near-infrared imaging and spectroscopy and hopes to further define redshift, exoplanets, galaxies, and stars 100 fold further out in space than the Hubble Space Telescope can resolve visible light. This article shows the depth of technology, creativity, and brilliance of the observational scientists who are trying to justify the standard model of cosmology, or open up new physics from their observations.
