

## TZ Modules

M. Haworth

Every caller should have a few Technical Zeros in the old bag of tricks. You can be very successful by following this simple formula:

1. Call a little theme in one location.
2. Use a Technical Zero to move some dancers to a new location.
3. Repeat the theme or call a similar variant.
4. Call a get-out to *resolve*.

The TZ ensures a mixing of dancers and very likely new locations for dancers to visit. You will of course have to understand the characteristics of the modules you employ. The modules presented here feature calls from the SSD<sup>1</sup> list.
