

HOMEWOOD DAM MEETING

MARCH 29,2022

MEETING PURPOSE

Renovation of Homewood Park/Stargel Field

Mubarak Ismael, President of Homewood Community Sports explained that the field was in need of a serious upgrade and that the new field would provide a state of the art site that would benefit the children who use the field.

Andrea Ketzel from the Department of Public Works did a slide presentation showing the new layout and the added amenities to the park.

Some persons in attendance had concerns about the parking and how that has had a negative impact on residents.

Another person had concerns about current safety at the field.

There was back and forth discussion on both of these issues and in the end the consensus was that this project would be a benefit to the community as long as residents were involved with the planning and implementation.

HCDC concurred with the consensus of those present.
