AgieCharmilles Mikron HSM 400U

CAPABILITIES:

GF AgieCharmilles unveils the latest models of their reference machines, available in both 3-axis and 5-axis versions, catering to high-speed milling. Introducing the HSM LP series (LP = Linear Performance), these machines have been meticulously crafted to deliver unparalleled precision and exceptional surface quality. Extensive design enhancements have been implemented, specifically targeting the machine bed, cooling system, axis drives, motion control, and tool measurement, ensuring optimal performance.
