

+GF+ Mikron MILL E 500 U

CAPABILITIES:

The new range of solutions represents the second-generation evolution of the HEM U series, inheriting its legacy while significantly enhancing machining capacity and performance on a sturdier machine platform. It is a remarkable capacity to handle heavy parts of up to 450 kg on its tilting, swiveling table, these advanced solutions empower users to produce a more extensive variety of parts and tools compared to any other machine available in the current market.
