

Jeff Meltzer PPL, IFR, A&P, ADO

Jeff started flying at 18 years old. With an aviation degree he began his career as an airline dispatcher. Jeff furthered his love of industry by obtaining his Airframe and Powerplant license. In addition to flying, Jeff is an entrepreneur and business owner.

Jeff's experience with club membership, airplane ownership frustrated his efforts to improve skills driving him to question the status quo of time builders. In his spare time he continues to quench his thirst for aviation knowledge, ski, hike, and of course, fly.
